BELL ROCK.

Margaret Moir, relict of the late George Moir, died at her home near Bell Rock, on Thursday, May 23rd, after only one day's illness. She was born in Aberdeen, Scotland, sixty-five years ago, coming to Canada when quite young with her parents, Mr. and Mrs. John Taylor. She leaves four sons and four daughters to mourn the loss of a devoted and loving mother. The sons are John, of Duluth, Minn.; William, of Bell Rock, Ont.; Kenneth, of Edmonton, Alta.; Roy, at home. The daughters are Mrs. Grant and Mrs. Clark, of Bell Rock; Mrs. Benn, Toronto, and Miss Elsie, at home. The deceased was an active member of the Methodist church for many years. The funeral service was conducted by Rev. C. W. Crane.

See in F. Chinneck's jewellery window the copper stencil monograms by which you can stamp all your linen as many times as you desire to from the same pattern and they are cheap.

25-b

NEWBURGH.

The continuous wet period is certainly beneficial to the future hay crop, although some of the farmers are held back from some of their spring work. Many of the gardeners have not started that industry yet.

It is with regret that the people learn of the Standard bank manager here, J. K. Frazer, being transferred to Cobourg. Mr. Frazer, during his time here for the past three years, has made himself an honorable citizen of the town. Mr. McHoul, of the west, is his successor.

The principal's room in the public school has been newly re-seated with individual seats.

The bridge constructors are at work here and are billeted at the Commercial hotel.

Thomas Loucks was removed to Kingston on Sunday, to undergo treatment.

Visitors: Stanley Wagar, at Mr. Chant's; G. Paul, at D. Scriver's; Miss M. Husband, at her mother's; Miss Beatrice Watson, with her parents; Harry Beeman, at his home; Dr. Beeman and son, Perth, at D. Beeman's.

Mrs. W. Swartz is at Toronto; Mr. Breeze, in Belleville; Mrs. Moore and granddaughter, at Napanee; R. T. Andrews, at Toronto; Miss Sadie Kennedy, at Bloomfield; E. Shorey and family, at his mother's.

Rev. Archibald Thompson left, on Friday, to attend the general assembly in Edmonton, Alta.

HAD CHARGE

The contest was conducted by De Luxe Circulation Inc. of 612 Kent Building, Toronto, and 80 Prince William St. John, N. B. The system of the De Luxe Circulation Company in conducting the contest has taken years to perfect, complete in detail that all in the Contest were assured square deal. The Controller, E. J. Hagan, wishes the contest was most successful. The contest speaks volumes for the effort by the candidates, an striking tribute to the high which the Napanee Express the people of Napanee and

THE CONTEST MAN

To the candidates and the public the Contest Manager, Hagan, desires to express for without their cooperation would have been impossible contest to have been a success.

AWARDING THE PRIZE

The Piano has been taken to the home of Miss Nellie Gordon.

INDULGENCE IS ASKED

And just now it may be asked to ask the indulgence of new subscribers. There is a rush of names and addresses that it will be impossible for the clerical force to catch up in a few days, and we therefore ask indulgence of those who receive the Napanee Express, promising to have the same mailing list for our next handling and enrollment of new subscribers is no longer a few days there will be some uncertainty.

Napanee, June 5th, 1912.

TO THE EDITOR OF THE NAPANEE EXPRESS:

Dear Sir—I am delighted with my piano, yes my very own was certainly worth every effort put forth by me, or more correctly by my friends. I wish through the columns of the Express to express my sincere gratitude to all my friends who so generously helped me in winning the piano. Especially would I thank the employees of the Seymour Power Co. A large number of people have admired the piano but I think I am the chief admirer.

Yours very truly,

NELLIE GORDON

NANANEE EXPRESS

\$1 per Year in advance: \$1.50 if not so paid.

ADA—FRIDAY, JUNE 7th, 1912

NANANEE CELEBRATION

Monday, July 1st, 1912.

The annual celebration will take place at the Driving Park on the above date. \$800 will be given in purses for horse races. Ball games have been arranged between Picton and Trenton and Belleville and Nananee. The citizen's band of Picton, will furnish music and run an excursion from Picton and bay ports. An excursion will be run by Steamer Varuna from Trenton and Belleville.

Arrangements are being carried out with the Curtis Exhibition Co., of New York, for one of the greatest attractions ever brought to Nananee. This company manufactures one of the most successful aeroplanes made in the world. Two very successful flights were made by this company at Kingston on June 3rd. It is a wonderful invention and will attract people from long distances to see the wonderful airship fly through the air. Watch for large bills.

PRESENTATION AND ADDRESS

The Professors and Students of Belleville Business College met in the College Chambers on the evening of May 31st to bid their Lady Principal, Miss Mary E. D. Wilson, daughter of Mr. F. S. Wilson, of our town, a temporary farewell as she intends to take a trip through to the Pacific Coast during the summer and they presented her with the following address:

Belleville, May 31st, 1912.

Dear Miss Wilson:—

We, the Students and Teachers of the Belleville Business College have learned with sorrow that you are about to depart from our midst and wish in some manner to express to you our appreciation of your untiring efforts in our behalf.

Your loyalty and long continued service in this institution deserve commendation, while your patience and cheerful expression have not only endeared you to us all but have fitted us more ably to fight this great battle of life, and have inspired us to become better men and women.

A great deal of our success in after years will be attributed to your excellent instruction and supervision and we shall look back upon the months spent here as among the most inspiring, the most helpful and the most pleasant of our lives. As a token of our appreciation of your services Miss Wilson, we ask you to accept this club bag, not for its intrinsic value, but as an expression of the esteem we entertain for you.

We sincerely hope and trust that in your travels God will continue to bless you and make your labours as productive of good results in the future as they have been in the past, and that when you look upon the gift

DESERONTO.

The first boat arrived on Monday, for
the Standard Chemical company, with
iron ore.

The steamer Porter and consort
arrived Monday with coal for Marl-
bank cement works.

The schooner Lizzie Metzler, left on
Tuesday with lumber for Oswego.

The schooner Jamieson loaded with
bunch wood for Kingston on Wednes-
day.

Capt. John Gowan is getting his
schooner, Theo-Voges, ready for the
season's work.

Misses Alice Cole and Babe Cole
spent the week-end with Mrs. Connell,
of Point Ann.

Mr. and Mrs. D. R. Jones have ar-
rived in town from London, England,
after an absence of two years.

Mrs. Edward Gaulin and daughter,
Veronica, left this week for Melburne
Bay, to spend the summer with Mr.
Gaulin.

Work is progressing favorably on
the new canning factory.

Mrs. P. Slavin left last week for
Winnipeg, to spend a couple of
months with her daughter. Miss
Grace Rennix came up from Montreal
to assist with the business during her
absence.

Miss Annie Fecteau and Miss Mamie
Marrigan, Belleville, spent the week-
end at their homes here.

Mrs. Simpson, of Belleville, is the
guest of Mrs. Sidney Groves.

Miss McLaughlin, deaconess, of
Toronto, has taken charge of the
work at the West End mission in
connection with the Presbyterian
church.

WILTON.

A large number from the Methodist
church met at the home of W. T.
Hodge Wednesday evening to maffe a
presentation and tender good wishes
to his daughter, Annie, on the eve of
her marriage. Miss Hodge has been a
faithful member of the choir for
several years. A beautiful dinner set
and berry set were given by her many
friends.

The league gave a successful social
last week.

A number of Presbyterians congre-
gated at O. C. Storms' a week ago and
presented Miss Beatrice with a hand-
some watch and chain, in appreciation
of her efficient services as organist in
the Presbyterian Sunday evenings.

Several Wiltonians attended the
King's birthday celebration in Kings-
ton.

City Dairy Ice Cream Bricks,
Maple Walnut, Neapolitan and
Vanilla with Cherries, generally
on hand. Take one home with
you on Saturday and use it for
Sunday dinner. Jessop's.

Come to Napanee celebration Mon-
day, July 1st.

Linked by Fate

BY CHARLES GARVICE

Author of "The Verdict of the Heart," "A Heritage of Hate," "Nell of Shorne Mills," "Paid For," "A Modern Juliet," Etc.

"We've got over the coincidence, Sutcombe," she said, as she gave him his tea, "and we are talking about the new play—Miss Wood's brother's, you know."

He nodded.
"May I, too, hear about it?" he said. "You know I am—well, interested."

At this Nina became rather shy—for talking to him about the play was a very different thing to talking to the gentle girl whose pale face and blue eyes were all aglow with sympathy and interest and the eager desire to admire and approve; but love maketh a man cunning, and after awhile Sutcombe led her on to the subject.

"Your brother must be very clever," he said. "It is a wonderfully good plot, I should say. There's only one thing—"

"Oh, what is that?" Nina enquired, earnestly. "Pray tell me—it is so full of faults—he would like to know—"

"Well, it's the card-playing scene. It's very 'strong,' as they call it; but it's just a little wrong in one detail. Baccarat isn't played as the characters play it—"

Nina smiled and blushed.

"Oh, thank you so much!" she said.

"How can one help making mistakes when one is writing about things one knows nothing about! Of course, I've never played baccarat."

The silence, the breathless silence with which Vivienne regarded her told her what she had done. Her face flamed, then went pale, and her brows came together.

"What does it matter?" said Sutcombe in a low voice that quivered with sympathy. "Besides, I guessed your secret while you were describing the play. But why should you be ashamed of it; why should you wish to hide yourself behind a man's name? Oh, I see! But that prejudice is dead! Strange as it may seem, the world is beginning to have a suspicion that women are as clever as, more clever than, us men."

"And—you—wrote 'The Betrothed,' and this play!" exclaimed Vivienne. "Oh, you dear, clever girl! But how did you guess it, Sutcombe?"

Sutcombe smiled only.

Nina made the best of the matter.

"I think I should like to keep my secret, so far as the public is concerned, Lord Sutcombe," she said, quietly.

He inclined his head. "Your wishes shall be respected, of course," he said. "Perhaps—perhaps I can be of some use. I mean there may be some other little detail which, as a man of the world, one who plays other games than baccarat, I might help you in—"

"Oh, yes!" put in Vivienne, eagerly. "Do make use of him, Miss Wood!"

"What I would suggest, if I may, is that Miss Wood should bring the

"Is he? I didn't notice," said Nina, absently. She was at that moment thinking of her last act, and when your playwright is thinking of that, all the rest of the world doesn't count.

Vivienne called for her as arranged, and they drove to Eversleigh Court. Sutcombe did not come in till tea was nearly over, and—he had schooled himself—greeted Nina in quite a casual way. She read the play, as far as it had gone; read it at first in a faltering, apologetic manner, but, presently, warming to her work and forgetting herself, read it with spirit and expression. Sutcombe, with his eyes upon her profile, listened intently, and now and again suggested some alteration in the details. Nina listened with the eager humility of the author, and jotted them down in her note-book.

Then Sutcombe disappeared and left the two girls to talk over the dress-ess, a subject which kept them so fully employed that Nina was persuaded to stay to dinner.

Nina was one of those women who possess the power of influencing the members of her own sex as well as men, and Vivienne, already predisposed, fell a victim to this unconscious influence. In a word, Lady Vivienne was not happy unless Nina spent some portion of the twenty-four hours at the flat. And if Sutcombe was not there all the time, he spent many hours in Nina's society. They were the hours of his life.

At last the play was finished and handed to Mr. Harcourt. "My Lady Pride" had nearly run its course, and he was eager to try the new comedy, and, if it went well in London, he intended running two, or even more, companies in the provinces. He was so satisfied with the play that he mounted it with more than the usual sumptuousness.

But before the eventful night had arrived, Lady Vivienne had shown signs of the wear and tear of the London air. The doctor on whose skill she and Sutcombe depended had said that she should winter abroad. "You used to have a yacht," he said. "Take her for a cruise, a long cruise. Anywhere out of the English east winds. I fear them more than anything else for her."

Sutcombe nodded; then frowned. "Give me to the sixth of next month," he said.

It was the date of the production of the new play, about which he was anxious, probably more anxious than Nina herself. When he told Vivienne that they would have to go abroad, she at once said:

"Let us persuade Miss Wood to go with us."

Nina received the suggestion as if it were a jest.

"Perhaps my poor play will be a failure," she said, "and I shall be

At al

notice his anecdote of gaiety, and when he had from seeing the girls hon to him quite quietly:

"What is it, Sutcombe?"

"We are nearly ruined," quietly as she herself

"Partridge, the trustee, and bolted. He has made everything, or nearly ever and I possess."

"What will you do," she asked, after a pause.

"God knows!" he said note of despair in his voice could he now speak to D

Re-Nu-All Wood Polish.

An antiseptic wood polish, kills germs and microbes with which the air we breathe is infected, at the same time imparting a brilliant gloss to everything which it is applied, at

you in—
"Oh, yes!" put in Vivienne, eagerly. "Do make use of him, Miss Wood!"

"What I would suggest, if I may, is that Miss Wood should bring the play and read it to us," said Sutcombe, in the most business-like tone he could assume.

Nina, the unsuspecting Nina, gave him a grateful look from her lovely eyes.

"Oh, will you?" she said. "How good you are to me! It is just what I want! But—the trouble!"

"Oh, don't mind that!" said the unselfish Sutcombe. "I've always got time to spare. How would it be if you came to-morrow?"

"Yes, yes!" Vivienne cut in again. "And I'll call for Miss Wood and drive her here. She lives with that bright girl—you remember how she made me laugh, Sutcombe?—Miss Bainford."

Sutcombe glanced at Nina, wondering how she would take this suggestion; but Nina, having no false pride, and, consequently, not being ashamed of her and Polly's humble diggings, accepted at once.

"That's all right," said Sutcombe; the phrase—it was Vane Mannering's—made Nina's heart leap. "Then I'll be off. I've to be at the theatre on business."

With love's cunning, he left the two girls together and went out into the streets to ask himself whether he was awake or dreaming.

When he returned Vivienne received him almost shamefacedly.

"Oh, Sutcombe! And I meant to help you, to help you to forget her! But I know now that it would have been impossible! I don't wonder at you—"

"Infatuation," he said, quietly; don't hesitate."

"She is too beautiful and lovable for words," she said. "If I were a man, I could not help falling in love with her. But—"

"But me no buts."

"But there is something about her. There is—an aloofness; I don't know how to describe it. Sutcombe, that girl has a history."

"Most of us have," he said with a smile.

"I know. But hers is not a common or garden one. She has passed through some great trouble. I'm sure of it. We women are quick at reading other women—"

"Too quick," he said, half impatiently. "What trouble, beyond that which falls to the common lot, can she have had? She may have lost her father, mother, some near relation—"

"No, it is not that," she said, thoughtfully. "That would not cause the air of reserve and—"

He put the idea from him with the lover's impatience. "You're making mountains of molehills, Viv," he said. "You were always romantic. What 'secret sorrow' should she have?"

When Nina got home she gave Polly an account of the adventure and the coincidence, and Polly nodded in open-eyed acquiescence and approval.

"The very thing, dear!" she said. "Lor! What luck you have! Lord Sutcombe can do what he likes at the Momus. Oh, we're in luck! And isn't he handsome?"

Or at Hooper's Drug Store.

"Let us persuade Miss Wood to go with us."

Nina received the suggestion as if it were a jest.

"Perhaps my poor play will be a failure," she said, "and I shall have to work for my living in some other way. Oh, it is quite impossible for me to go!"

The eventful night arrived, and Nina, in her old place in the corner of the upper circle, went through the usual agony; but there was really no cause for apprehension, for the end of the first act caught the audience, and they were tightly held during the remainder of the play. It was an unqualified success, the kind of success about which there can be no possibility of doubt. The house was charged with enthusiasm, and it was for some time in vain that Mr. Harcourt, coming forward, with his hand upon his heart and a smile from ear to ear, to inform the house that Herbert Wood was not present, could make himself heard. The house seemed very disappointed, but it was the only disappointment of the evening. It is nice to be able to record the fact that "the promising young actress," Miss Polly Bainford, scored very heavily in a part peculiarly well suited to her by no means limited capacity. Sutcombe, flushed with excitement, went round to the upper circle in search of Nina, who, her identity little suspected by the audience, was leaning back with her hands tightly clasped in her lap, and a look of relief and thanksgiving on her rather pale face.

"I congratulate you!" he whispered. "Let me take you round to our box. If you would help Vivienne down, I will go round and bring Miss Bainford. Yes," he added with a smile, in response to Nina's look of surprise, "Vivienne admires Miss Bainford very much, and is anxious to know her. It is quite a concession on her part, isn't it? But prejudice always melts away in the sunshine of common sense."

It was a very delightful little party at the flat, and Sutcombe proposed Nina's health, and insisted upon them filling their glasses as if they were at a city public dinner, and all Nina could say in response was, "Thank you very much!" But her eyes, not undimmed with tears, were more eloquent.

Sutcombe lit his cigar after supper, and, on his way to the cigar cabinet, took up some letters which were lying on the table. He opened them quite mechanically and absent-mindedly; for he was all aglow with love and admiration for Nina, and he was asking himself whether he dared venture to tell her that she held the happiness of his life in her hands. He had been so careful to conceal his love, he had set so stern a watch on lips and eyes, that he knew Nina had no suspicion that he had lost his heart to her. Should he tell her to-night? He asked himself the question with an anxious dread, for he knew that she would not give herself to any man unless she really loved him, and the fact that he was of higher rank than herself would not influence her.

His thoughts were running in this and similar directions, when something in the letter he was mechanically reading caught his attention. The blood rose to his face, then left it very pale, and he stood, with his back turned to the others, staring at the letter as if he could not grasp its sense. Then he put it in his pocket, went back to his place at the table and tried to appear as if nothing were the matter.

But Vivienne's eyes were quick to

cheerfully as possible, were full of a wistful spoken prayer, which Nina in the grave news, did she seemed to be thin but not feeling very. Vivienne watched her with

Suddenly Nina looked brows were drawn straight were grave and thoughtful was a touch of unwonted cheeks.

"Shall you have to go cruise?" she asked.

"Well—no," said Sutcombe. "happens, Vivienne has seen in Australia, and we're taking the Ariel there to see any money could be made the land, I mean."

Nina looked down for then up at his face with

"You asked me to go other day. Will you take she said in a low voice.

CHAPTER XI

The Ariel was skimming opal sea, her white sail the light breeze, her bow falling proudly as she sailed along her sleek sides; but not looking at the beautiful sky. On her lap, as she deck-chair, which was as far forward as the we permit, was spread out over which she had spent hours of the voyage, brooding, sometimes with hope, but oftener with

been examining the chart again—Oh, Lord Sutcombe, how patient you are! It—it is that that hurts me! If you would only laugh at me, if you would only tell me that your patience is exhausted, that you will bear with my—my whim no longer, I think I should be less heart broken." "Why should I tell you that which is not true?" he responded, his eyes resting on her bent head with unspeakable sympathy and tenderness. "And yet it would be so—so natural, so well deserved!" she retorted, bitterly. "Sometimes I wonder why you did not think that I am stark, staring mad, that I am the victim of a wild delusion—" It was Vivienne's word, but she still smiled. "For what is it that I have asked you to do, and you, so generously, so trustingly, have consented to do?" she went on with a deep sigh. "Not a very great thing, surely!" he said, trying to answer and reassure her in a breath. "You have asked us to leave the direct course, to turn aside that we may help you to find a certain island, of which you know, and which you want us to visit." "An island not marked on the chart, a nameless place, as nameless and intangible as that of a dream. Sometimes," sighingly, despairfully, "I wonder whether it exists only in a dream: whether I shall wake to find that its only place is in my imagination. And yet—no! If you only knew! Why do you not insist upon my telling you all, everything? Why do you not refuse to continue in this mad search unless I give you better reasons for doing so?" "Because I love you so dearly that if this island ever existed, and the search were as futile as that for the philosopher's stone, I would not turn from it until my heart cold

greeting. "Nothing, Barnes?" she asked with repressed eagerness. "Nothing, miss," he admitted reluctantly. "I've changed her course for west due west, and—we shall see, miss. We may sight land before noon—" "To find another group of islands—but not those we want," she said with a sigh, as she turned away. Barnes shook his head at the sails. She who had been so ready with the sweet smile, the gentle word which had won the hearts of the men, as they had won the heart of their master, had grown almost irritable and impatient, and Barnes as he watched her standing at the bow with her hand shading her eyes, hopeless and incredulous of "Miss Decima's island," shook his head again. But he held on to his course, and about noon Nina, who had been leaning against the taffrail, her eyes fixed on the sea, uttered an exclamation and pointed at some object floating on the waves. "Seaweed!" said Sutcombe, coming quickly to her side, and he turned towards her with an eagerness almost as keen as her own, then shouted the word to Vivienne. In silence, almost breathlessly, they watched and waited. But "Miss Decima's luck," as the men had grown to call it, pursued her even now; for as they gazed a slight mist rose above the horizon, gradually crept towards and enveloped the yacht, shutting out sea and sky. Down came the sails, and the vessel floated like a bird through the white fog. They should have anchored, but Barnes withheld the order, and, taking some soundings, let the vessel drift. Nina turned away; her eyes were dim and on her lips flickered a smile that was worse than tears. "Fate is against me!" she said. "The time is up—and I am beaten!"

"Because I love you so dearly that
if this island ever existed, and the
search were as futile as that for the
philosopher's stone, I would not
turn from it until my heart told
me you wished to do so," he might
have replied; but instead he said:

"Why grieve so about the matter,
Decima? No harm has been done. We
have had, are having, fine weather;
it does not matter whether we reach
port this week or the next. And
Vivienne is of the same mind as I. If
you would only be less anxious! Do
you think we cannot see that the
strain is telling on you, and that we
do not—suffer? Ah, do not be so
unhappy! Nothing—nothing is worth
that!"

She pushed the hair from her fore-
head and looked up at him gratefully.

"How good you are to me!" she
said in a low voice. "Well, bear with
me a little longer. Listen, Lord
Sutcombe. If—if we do not discover
this island to-morrow, I will tell you
why I have persuaded you to turn
out of your course in search of it;
I will tell you—all. It is only fair.
But give me until to-morrow. Bar-
nes tells me that he will try a new
course, that he himself feels certain
land, islands, perhaps, are nearer
than the chart indicates. Give me
till to-morrow at noon!"

"I will give you twelve months of
to-morrows if you like," he said, fer-
vently; "we will run in at the next
port and provision the yacht for a
year's cruise—"

She turned from him half impat-
iently.

"Only till to-morrow!" she said,
and she bent over the chart again.
But her eyes were dim with the
pangs of disappointment and failure,
for the Ariel had been beating about
for weeks in search of the nameless
island, and the dream, the bright
dream which she had dreamed the
night Sutcombe had told her of their
loss, and she had been compelled to
ask them to let her go with them,
was growing faint and pale with the
sickness of hope deferred.

After a time she folded the chart,
rose resolutely, and with a gesture,
as of one throwing off a heavy
weight, went to the other two.

"From this moment," she said, "I
will say no more, no, not a word.
If—if we fail, then you shall think it
was just a dream, a delusion—ah, do
you think I do not know what is in
your minds!" as Vivienne colored and
lowered her eyes.

"Let us go and have some music,
dear," said Vivienne, laying her hand
on Nina's arm tenderly, for she knew
that while they remained on deck
Nina's aching eyes would scan the
sea, that seemed to mock her with
its emptiness.

They went below, and Nina, act-
ing up to her resolve, played and
sang and talked, as if her heart were
not racked with suspense; but as she
lay in her berth that night the bit-
terness welled up in her. And it was
not altogether unselfish. For as the
Ariel had approached the spot where
she imagined the Fairy Isle to be,
there had arisen and grown an aching
longing to see once more the
place where she had suffered—and, ah
yes, for a short time, enjoyed—so
much. Vane Mannerism was lost to
her—she did not know whether he
was alive or dead—but for a few
fleeting hours she had basked in the
knowledge of her own love for him,
and the hope that his love might
turn to her.

She slept at last, a fitful sleep, but
was up on deck soon after dawn, and
Barnes, at his wheel, touched the
peak of his cap and smiled his shy

Nina turned away; her eyes were
dim and on her lips flickered a smile
that was worse than tears.

"Fate is against me!" she said.

"The time is up—and I am beaten!
Lord Sutcombe, I—I—give it up!"

"Wait!" he said. "Look!" and he
waved his hand toward the mist.

It was lifting as swiftly as it had
fallen; before it had quite cleared out
spread the sails, and the Ariel drove
through it. Clearer and yet clearer
grew the air, and then, so suddenly
that they had scarcely time to ex-
claim, there lay before them the vi-
sion of an island, green as an emer-
ald, and set in a golden line of sand,
with the shrill cry of the sea-birds
circling round it, the waving of the
fir-trees on its crest.

It was Vivienne who first cried out.
Nina stood, her hands clenched on
her bosom, her eyes like those of one
in a trance. Sutcombe turned to her
with an instinctive gesture of sym-
pathy, for her lips were white and
her breath came painfully.

"It is the island, at last!" she
said.

The skipper's word of command
rang out, the "Aye, aye, sir!" of the
men followed sharp upon it, the sails
fell as if by magic, and the Ariel
was anchored within, as it seemed
in that clear air, half a mile of the

island which even yet Nina could
scarcely help regarding as a vision.

Sutcombe took her hand and press-
ed it, and she turned to him as if
awaking from a dream; but with sur-
prise he saw that there was no joy
in her eyes, only an expression of
satisfaction that was not tinged
with sadness.

(To be continued.)

A WOMAN'S WISDOM.

The worried mother wakes up to hear her baby's heavy breathing—a little cough—perhaps the croup or whooping cough. She does not want to send for the doctor when perhaps the trouble does not amount to much. Finally she thinks of that medical book her father gave her, *The Common Sense Medical Adviser*, by R. V. Pierce, M. D. She says "just the thing to find out what is the matter with the little dear." Two million households in this country own one—and it's to be had for only 31c. in stamps—1,000 pages in splendid cloth binding. A good family adviser in any emergency. It is for either sex. This is what many women write Dr. Pierce—in respect to his "Favorite Prescription," a remedy which has made thousands of melancholy and miserable women cheerful and happy, by curing the painful womanly diseases which undermine a woman's health and strength.

MRS. ZURBERT AND BABE.

"My desire is to write a few lines to let you know what your valuable medicine has done for me," writes MRS. MARGARET ZURBERT, of 323 S. Benton Street, Baltimore, Md. "Before the storm came to our house I was a very sick woman. I wrote you for advice which was kindly given and which made me a different woman in a short time." After taking the first bottle of "Favorite Prescription" I began improving so that I hardly knew I was in such a condition. I did my own housework—washing and ironing, cooking, sewing, and the worst of all nursed three children who had whooping cough. I hardly knew of the advent ten minutes before—so easy was it. The baby is as fat as a butter-ball. Dr. Pierce's Favorite Prescription is the best medicine for any woman to take when in this condition. I recommend it to all my friends."

THREE FORMS OF WATER.

Either of Which Can Ever Be Changed Into One of the Others.

There are three forms of matter, solid, liquid and gas, and water is capable of taking any of them, just as the famous genie in the "Arabian Nights" could take various forms at pleasure.

We usually drink water in what is called its natural state. When we put the kettle on the fire to boil some water our object is simply to make it hot, but we still want the water to be water.

If we forget about the kettle and leave it on the fire too long we shall find the water all gone. The heat has turned it to gas, and it has floated off and mixed with the air.

But when we have a stove in the room and put a pan of water upon it we do not want the water. What we want now is the gas. As it boils away it restores to the air in the room the moisture that is dried up by the heat of the stove, so that the air is still fit to breathe.

In winter, when the skating season is on, we like to find some water that is neither liquid nor gas, but solid. The reason that it has turned solid and not gas is that instead of heat being applied to it all the heat has been taken out of it, but we can soon get it back to water again if we take a piece of ice into a warm room.

Water absorbs heat very quickly, and that is why it is easy to boil it. We use this absorbent quality when we sprinkle water on the floor in summer. It absorbs the heat and cools off the room. We pull down the shades to keep the heat out, because we know that the walls and the stone pavements make things hotter. Remember the scientific rule, "Solids, reflect heat; fluids absorb it."

No matter in what form we find water, we can always change it into either of the two other forms. When the water boils away we can hold a cold plate over it and see the vapor condense again into drops. We can take the drops out into the cold winter air and watch them freeze solid and then take the ice back into the room and thaw it and put it into the kettle again and see it rise in vapor once more.

SPLIT THE BRIBES.

Humorous Aspects of Vote Buying In the Island of Guadeloupe.

M. Gerault-Richards, according to *Le Cri de Paris*, freely communicates the processes employed in securing the election of a deputy in the island of Guadeloupe, where the population is almost entirely negro, to the French chamber of deputies.

"A little commerce with the electors of Guadeloupe," he said, "demonstrated to me that if the least confidence was given to the promises of these fellows I should be duped. I soon found out that to retain the interest of these electors I should give but half the present in advance, the second half to be given after the election in case of success. Following this arrangement, they were given one of a pair of shoes, the pair not to be completed until they had voted. The women of some lords of importance received their earrings in two installments.

"A superb pair of pantaloons of white linen bordered with red were shown one influential elector. The pantaloons were then cut in two in the middle, one leg being given to the voter and the other retained, to be given after he had done his duty.

"That same evening," said M. Gerault-Richards, "I met my good man proudly promenading the street clothed in one leg of the pantaloons. No one ridiculed his appearance. Some of his friends even complimented him."

MUSIC AND MISERY.

Ills, Aches and Pains With Which Performers Have to Contend.

Pianist's cramp is more painful than writer's cramp and is the bane of all virtuosos. It is caused by the constant contraction and expansion of the muscles controlling the fingers. It becomes chronic when not guarded against, and many a promising virtuoso's career has been blighted in this way. The only remedy is to rest the overtaxed muscles and then work them up gradually to meet the strain of constant playing.

All concert pianists are subject to split finger tips. The constant stroke of the balls of the fingers on the hard ivory makes the flesh so delicate and

PRESS COMMENTS.

Brandon Sun—The 24th of May is Empire Day now, but it will never be anything but the Queen's birthday to the earlier generation of Canadians.

Montreal Herald—Great Britain only naturalized 1,500 aliens last year. Canada often takes in during a week as many as Great Britain gets in a year, which by the way is another reason for asking that the kind of citizenship we can give be made as good as that given in Great Britain.

Galt Reformer—It is always well to bear in mind that the business of the public is always public business. Publicity keeps the people informed and sustains public interest. Besides, it is one of the best safeguards the people's representatives can have against the temptation of neglecting or forgetting the people's interests.

Montreal Gazette—The Farmers' Bank was not a bank, but a confidence game. It took in the community that thought the York Loan Company's work the embodiment of high finance and furnished food for several hundred Cobalt wildcats. It can reasonably be doubted if Travers could have fooled the people of any other part of Canada.

Hamilton Times—Sir James Whitney is said to be going to prepare a very drastic law against treating, which will aim to reach the hotel-keeper, the bartender, the man who is given the treat and the man who buys the treat, with fines of from \$100 to \$200. Sir James probably feels the necessity of bringing about a close combine to prevent prosecution.

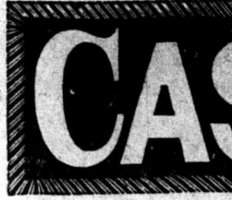

Kingston Standard—The Canadian banking system lends itself to the creation of a money trust better than any other in the world. The bank acts confers upon our Canadian banks great and profitable privileges. The steady decrease in the number of chartered banks in the past few years is an ominous sign, especially as the business of the country has been increasing enormously.

Edmonton Bulletin—If there is in the minds of the Canadian Ministers any notion of doing anything which will accord with the plans of the Admiralty and which will remove from Canada the stigma of being the only British dominion which is doing nothing at all, they have only to un-earth the tenders they threw away six months ago and let the contracts for the Canadian cruisers.

Toronto Globe—The peril of Nationalism and Ultramontaniam is sending thinking men in Quebec of both races back to Liberalism. The Eastern Townships were formerly almost exclusively English speaking, and there is still a very large English population in that part of Quebec. For the first time in the history of the Province, at the recent election every riding in the Eastern Townships returned a Liberal member to the Legislature—fourteen seats, and fourteen Liberals.

Ottawa Journal—The moral for all our Governments, Dominion or Provincial, is to strain every means to promote farming immigration, and to exploit scientific agriculture. Liberal assistance should be given by all our

split finger tips. The constant stroke of the balls of the fingers on the hard ivory makes the flesh so delicate and tender that frequently playing becomes acute agony.

Violinists suffer a great deal of physical inconvenience. Most of us have an idea that the violin is held against the neck and shoulder by the player's left hand, which grasps the arm of the instrument. All great violin teachers insist that the left hand be left entirely free, and to achieve this the violin is actually held by the player's chin. In this attitude his head is held in a distorted position, and this, working against the elevation of the left arm and shoulder, causes compression of the heart and lungs and curvature of the spine.

Performers on wind instruments suffer many inconveniences, and in some instances their work leads to permanent physical disability. Bulbar paralysis from continued use of the tongue and lips is an ever present danger. Doctors have a fearsome name for the commonest result of wind playing. In plain language it is overdistention of the lungs. This stretching of the lungs from constantly heavy inflation leads to engorgement of the blood in the right cavities of the heart, and this produces dilation of the heart and hypertrophy.

Mental peculiarities of oboe players are traditional in the orchestral world, in spite of the fact that most oboe players are normal. Some explain that the oboe player is mentally affected by the fact that he is forced to blow through an exceedingly small aperture and the expiration is unusually prolonged. Others insist that the peculiarly melancholy quality of the tone produced and the invariable character of the music written for the oboe are responsible for any peculiarities displayed by its executants.

After this somewhat gruesome recital it is cheering to know that one instrument at least can be counted on to bring health and longevity to those who practice it. This is the flute. Doctors recommend it for incipient consumptives, as the operation of playing the instrument involves the precise motion of the lungs of most benefit to the consumptive—that is, full inspiration, not too full or strained, followed by slow and gentle delivery of the breath.—John Warren in Washington Star.

Korean Marriage Customs.

The Koreans marry young—sometimes as early as twelve or fourteen—the matches being arranged by the older people, as in China and Japan. The young folk have very little to say in the matter. After marriage the young couple usually live with the husband's parents—in the old patriarchal fashion. The wife, provided her husband is able to afford servants, is kept pretty closely at home, only the women of the lower classes going out much in public.

Automobile Polish.

To brighten up any varnished surface use Red Cross Automobile Polish. Just the thing for Pianos, Carriages, Automobiles, Hardwood Floors, and enamelled work of any kind. It will not injure the finest surface. Price 25 cents at Wallace's Drug Store, Nananee.

our Governments, Dominion or Provincial, is to strain every means to promote farming immigration, and to exploit scientific agriculture. Liberal assistance should be given by all our Governments to immigrants arriving to settle on the land; conditions of settlement on Crown lands should be made as easy as possible; experimental farms should be lavishly promoted; duties on agricultural machinery and implements should be cut down.

Ottawa Journal—As has been previously said, the moral at present is that the Dominion Government in the coming revision of the banking act should not merely provide for better Government supervision of the banks than hitherto, and for independent bank audits, but it should take into special consideration the tendency of the banks towards mergers and frame the law so as to prevent further steps that way, except by specific Government cognizance and permission.

Montreal Star—It is unfortunate that Parliament is not in session while this matter is uppermost in the public mind. But the leaders could get in touch with each other very quickly, and a combined pronouncement would put the "patronage" hunters to flight. Even a strong utterance by one set of leaders, would probably force the hands of the others. Public opinion is ready to back such an utterance very vigorously; and politicians ought to know that the time to lead public opinion is when it wants to be led.

Winnipeg Tribune—Nowadays the preacher who insists on strikingly bringing the example of Christ into the daily lives of church members either gets a large congregation and a reputation as a true disciple of Christ or a notice that the tone of his utterances leads some of the big financial supporters of his church to believe that his usefulness in that field is impaired. It is one thing to preach Christ and quite another to apply Christ to the daily practices of the leading supporters of some churches.

Vancouver News-Advertiser—The British Government is becoming alarmed at the dimensions of the Scottish emigration to the Dominion. Up to the present British politicians have exhibited an academic interest in the movement, and now it is directing their attention to small holdings as a possible influence to stem the tide. If Canada can improve the status of the British farmer who stays at home and give a homestead to those who come this way it will be killing two very fat birds with one stone.

Vancouver Sun—A full measure of control over the movements in peace of any naval force which with British help we may bring into efficient existence—that was the disloyalty of Sir Wilfrid Laurier's policy, according to his opponents in Parliament. It was disloyalty in Sir Wilfrid Laurier and it was Imperialism in Mr. Winston Churchill. It is Imperialism, and proclaimed as such, by every Tory newspaper and every Tory speaker between the Atlantic and Pacific Oceans who, when the Laurier policy was announced, belloyed for the official scalp of the only man in Canada who had sufficient statesmanship to formulate an Imperial program or the courage to endeavor to carry it into effect.

COLLIERS' SUPERSTITIONS.

Miners, Sailors and Fishermen Live In a Supernatural Realm.

Colliers, miners, sailors, fishers—all men who come closely into contact with the elemental forces and secrets of nature—are strongly disposed to believe in omens and superstitions. The Celtic races, which include the Welsh collier and the Cornish miner are extra susceptible to occult influences and symbolism of every kind. It is in their blood; they seem to live on a borderland between the natural and the supernatural.

The Welsh colliers cannot bear to see white birds hovering around the pits, for they presage death; and the collier who goes below after seeing them is heroically stout-hearted. The Welsh collier has, moreover, a prejudice against all white animals through this fear. He would not dare, for instance, to tempt Providence by keeping a white cat as a pet, and if one came to the house he would consider it very unlucky. White doves flitting about the coal mines are peculiarly ominous.

The bird as an omen of death is also

WEATHER PROPHETS.

Our Ancestors Had a Lore Not to Be Despised.

Primitive, tentative and slow as were the old world methods of foretelling the weather there can be no doubt that they had a great charm of their own, and gave to those who practiced them more inducement to study nature at first hand than do the scientific, up-to-date prophesies of the meteorological office.

Perhaps for purposes of practical utility the simple weather lore of our British ancestors did not fall so very short of the more advanced knowledge of to-day.

On one point all old-world weather lore is unanimous. It is the advantage that results to health and crops from having seasonable weather. "A winter spring is not worth a pin" was an axiom in those days.

January was expected to be cold, and everyone, judging by the proverbial wisdom of the times, was resigned to it. Bitterly cold too it must have been if we are to believe that "Janvier will freeze the pot on the fire" and that "as the days lengthens the cold strengthens." Could it, we wonder, have been any consolation to freezing men and shivering children to remember that "A green Yule makes a fat Churchyard" or that "in a year of snow the fruit will grow?"

February also was looked on as essentially a winter month. As its province was "to fill the dyke either with the black or white" there was obviously nothing for it to do but to rain or snow. If it wearied of its role and occasionally, by way of novelty, brought a few warm days to a frost-bound world its only recompense was the ungrateful title of "double-faced February." A clear condemnation of such temporary alleviation! Shakespeare uses this expression in "Much Ado About Nothing," "Good Morrow, Benedict. Why, what's the matter that you have such a February face? So full of frost and storm and cloudiness."

North of the Tweed (we can readily believe it) no pretensions to fine weather were permitted to February. "A' the months in the year curse a fair Februarie" says one Scotch proverb and another declares:

"February an be ye fair

The hoggs will mend and naething mair."

Hoggs, we may mention, for the benefit of our readers being the old Border name for sheep which have not yet been shorn.

In most striking contrast to our modern notions March, in proverbial wisdom, is depicted as rather a pleasant sort of month. Rough and ready, perhaps, and a trifle over fond of bluster, but on the whole a good sort with his hands full of benefits, and not altogether an unpleasant companion. His is a dry humor and naturally one fully appreciated after the

HER WEIGHT INCREASED FROM 100 TO 140 POUNDS.

Wonderful Praise Accorded Peruna the Household Remedy

Mrs. Maria Goertz, Orienta, Oklahoma, writes:

"My husband, children and myself have used your medicines, and we always keep them in the house in case of necessity. I was restored to health by this medicine, and Dr. Hartman's invaluable advice and books. People ask about me from different places, and are surprised that I can do all of my household alone, and that I was cured by the doctor of chronic catarrh. My husband was cured of asthma, my daughter of earache and catarrh of the stomach, and my son of catarrh of the throat. When I was sick I weighed 100 pounds; now I weigh 140.

"I have regained my health again, and I cannot thank you enough for your advice. May God give you a long life and bless your work."

damp and cold of his predecessors. "A dry March never begs his bread" and as to the dust he raises (which we poor sons of a modern day find so trying) we hear with astonishment that "A peck of March dust is worth a king's ransom."

When we come to April and May we encounter beings of quite a different temper. April is described as sweet and tender if a bit uncertain, and is a month to which much is allowed and forgiven. She has many moods, and they are all equally right. If she be cold "the barns will fill." Should she "blow her horn 'twil be good for hay and corn." Her very tears are beneficial for "an April flood carries away the frog and his brood."

May, the merry month, was unmistakably first favorite in the days of Merry England. She was crowned Queen, and has rites and songs and dances of her own. Like some transcendental Midas her magic touch turned all things to gold or whatever may be the rural substitute for that base and earthly metal. "A swarm of bees in May is worth a load of hay," and "haddockes are good when dipped in May flood." She is the month of flowers and of beauty and of joy. Still she is feminine and has the faults of her quality, so we must beware and "change not a clout till May be out."

A Woman's Reason.

"My, but I do hate this corset!" said Mrs. Nagg as she tossed her harness on the dresser.

"Then why do you wear it?" snapped Mr. Nagg.

"Oh, it feels so good when I take it off," replied Mrs. Nagg.

DUSTBANE

MILES McKEOWN,
Deputy

MARLBANK.

Meadows are looking fine. A lot of spring seeding has been put back on account of the wet weather. Potatoes and other vegetables have not been planted yet. Fall grain looks fine and prospects are for a good crop if there is fine weather from now on. The flats will drain off and grain will not be much damaged unless the rain continues. Orchards, small fruits and strawberries are looking fine.

Come to Napanee celebration Monday, July 1st.

SELBY.

A feeling of sadness was cast over the village Thursday when the news came of the death of Mr. Frank Dean, of Napanee, formerly of here.

Miss S. Fitzpatrick, Moscow, accompanied by Miss Gladys Asselstine, spent the 24th with her parents here.

Miss Mabel Denison spent a few days with her friend, Miss Richardson, of Roblin.

Mrs. J. Gunn and Mrs. T. Amey spent last Thursday with friends at Fair View.

Visitors: Mr. and Mrs. Sherry at A. Wood's; Mr. and Mrs. Masters at D. W. McKim's; Mr. and Mrs. C. Loury at J. Wood's; Miss Reed at Mrs. Inness'; Mr. and Mrs. N. Ramesy and children at N. Doidge's.

ONTARIO HISTORICAL SOCIETY ANNUAL MEETING**The Residential and Business Section of the Town Beautifully Decorated for the Occasion.**

The thirteenth annual meeting of the society is being held in Napanee this week, and the town is en fete for the occasion.

This meeting marks an epoch in the history of the society, it being the first centennial celebration held in Canada of the war of 1812.

The first meeting was held on Wednesday afternoon in the Historical Hall, a goodly number of delegates being present and registering.

The President, Mr. David Williams, of Collingwood, called the meeting to order.

The secretary of the society, Mr. Clarkson W. James, presented his annual report showing that the society is progressing splendidly, both numerically and financially, and shows a healthy growth year by year.

Mr. Williams gave a comprehensive outline of the work of the society during the past year.

Mr. C. M. Warner gave the report of the Historic Sites Committee outlining the places of historic interest which have been marked by the society with tablets, windows or monuments.

Mr. A. R. Davis presented a resolution to erect a suitable memorial to the late Sir John A. McDonald on the site of the old McDonald home, of which Mr. Davis has the title deeds. These deeds he offered to the society. The farm is situated on the shores of Hay Bay, in Adolphustown Township. The motion was seconded by C. M. Warner and carried unanimously.

Mr. Alexander Fraser, Provincial Archivist, sent regrets on his inability to be present.

REPORTS OF AFFILIATED SOCIETIES.

Lundy's Lane Society, presented by Mr. J. H. Jackson, of Niagara; Niagara H. S., by Miss Janet Carnochan; Elgin H. S., by Dr. Coyne, St. Thomas; Woman's H. S., of St. Thomas, by Mr. Wegg; Huron Institute, by Miss Redmond, Collingwood; Lennox and Addington H. S., by Mr. C. M. Warner; Essex H. S., of Windsor, by Mr. Belleperche; Woman's Canon H. S., Toronto, by Miss Tocque; Frontenac H. S., Kingston, by Rev. Canon G. L. Starr; Woman's Canadian H. S., of Ottawa, by Mrs. J. B. Simpson; all of which showed the above names societies to be in good condition.

The event of the day was the ceremony of unveiling a brass tablet by Mrs. A. T. Harshaw, Regent of the U. E. L. Chapter, I.O.D.E., bearing the following inscription:

"TO COMMEMORATE THE FIRST CENTENNIAL CELEBRATION HELD IN CANADA OF THE WAR OF 1812 ERECTED BY THE UNITED EMPIRE LOYALIST CHAPTER I. O. D. E. AT THE ANNUAL MEETING OF THE ONTARIO HISTORICAL SOCIETY JUNE, 1912."

MRS. HARSHAW'S ADDRESS.

MR. PRESIDENT, LADIES AND GENTLEMEN:

At the request of the President of

that the local Chapter of the Daughters of the Empire, esteem it a very great privilege to be so closely associated with the first centenary celebration, held in Canada, commemorative of the War of 1812, and of the Annual Meeting of the Ontario Historical Society, which assemblage, we, with other townspeople join in welcoming.

The pleasant task, devolves upon me, Mr. President, and Members of the Lennox and Addington Historical Society, to present to you, on behalf of the "United Empire Loyalist" Chapter, I.O.D.E. a brass tablet, commemorating the events just referred to.

It is especially gratifying to make this presentation, as the enthusiastic President and officers of our Historical Society have done so much to promote a lively interest in the annals and history of these old historic counties, and of history in general.

It is therefore, with much pleasure, that I now unveil this tablet as an evidence of the interest and good wishes of a kindred organization, and ask Mr. President, the Society's acceptance of the same.

AT THE TOWN HALL.

At 8 p. m. on Wednesday evening Mayor Waller in a few words expressed the great pleasure of the citizens of the town of Napanee in having the members of the Ontario Historical Society hold their meeting here and hoped the delegates would derive as much pleasure and profit from their meeting here as the citizens of Napanee felt in having the members of the society in the town for a few days. Mayor Waller wished the delegates every success in their meetings.

Mr. Williams, President of the Association, briefly expressed the thanks of the Society for the hearty hospitality, sincere in every way, extended to the Society. Mr. Williams expressed the thought that the lights shining in the arch on John street were not more bright than the hospitality extended to the society. This part of the country is not so well known to the members of the society as it should be, but thanks to the untiring efforts of Mr. C. M. Warner in securing the meeting for Napanee the society hoped to know a lot more about this part of the country. This meeting of the society is the largest presided over by Mr. Williams and it gives them the great pleasure to accept the hospitality of the citizens of Napanee and will carry away with them fond recollections of their visit.

Interesting papers were read by Mr. Walter S. Herrington, Napanee, on "Local Historical Subjects"; Mr. Geo. R. Dolan, Kingston, on "Fort Henry" and Mr. R. Gold Thwaites, Madison, Wis., on "The Romance of Mississippi Valley History." The paper of Mr. Herrington was of special interest, dealing as it did with local historical subjects.

We hope to publish Mr. Herrington's address in full in our next issue.

A few well chosen remarks on the value of history by Sir Edward Walker, C. V. O., brought the meeting to a close.

MRS. HARSHAW'S ADDRESS.

MR. PRESIDENT, LADIES AND GENTLEMEN:

At the request of the President of our local Historical Society, and as representative of the "United Loyalist" Chapter, of the Imperial Order Daughters of the Empire, of which I have honour to be Regent, I appear before you this afternoon, and would ask your attention for a few moments.

The occasion is particularly felicitous, and is one with which our organization is very much in sympathy, indeed it is hardly necessary for me to say, as representing the Imperial Order,

A few well chosen remarks on the value of history by Sir Edward Walker, C. V. O., brought the meeting to a close.

OFFICERS ELECTED,

Election of officers took place on Thursday morning, resulting as follows:

President—Mr. John Deanness, London.

1st Vice-President—Mr. C. M. Warner, Napanee.

2nd Vice-President—Sir Edmund Walker, Toronto.

The other officers will be elected by the general council.

The Oldest Bank.

The Palazzo San Giorgio on za Caricamento, Genoa, has important role in the history Italian city and of the world. It was built in 1260 by Guglielmo Boccanegra, captain of Genoa, and, after as his residence, was the head of the celebrated company of St. George. Our modern banking sprang from this office, and the Società delle Cc San Giorgio was the first liability company. The architect place was a monk named Ottavio, though its architecture has a number of changes the first speaks eloquently of the thirteenth century. Its arcades with pointed arches and its windows formed of umns are exceedingly charming.

IF NEDA HAIR RENEWING
not the BEST of its kind ever used your money restores the natural color of the hair. Guaranteed. Sold JESSOP'S.

The Council met at 8 o'clock. The members present were W. R. Lott, A. McCutcheon, siding.

The minutes of the last meeting were read and approved. Moved by A. McCutcheon, seconded by E. R. Sills, James McCormick read a letter filed for future reference.

R. W. Paul gave notice of appointment of a Clerk.

R. W. Paul introduced a resolution moved by R. W. Paul for the appointing of a clerk be tried.

Moved by R. W. Paul for appointing a clerk be filled of one hundred and thirty.

Moved by R. W. Paul for appointing a clerk be read, sealed and signed by the Council.

Moved by A. McCutcheon, accounts be paid: John H. W. Paul, trip to Ottawa re on Old Sheffield road, \$18.00 \$8.35; George W. Pringle, Mowers aid for month of May \$3.00. Carried.

Moved by W. R. Lott, John S. Aylesworth, Town of McCormick has been filed with meet at the place requested.

Moved by W. R. Lott, Joyce be paid the sum of \$1 clerk, and \$2.00 for services.

COUNTS.

COLLIERS' AMBITIONS.

Posts, Musicians, Novelists and Clergy
Evolved From Ranks of Miners.

Though the life of a collier is hard
and trying, not a few of the men who
work in the pits have shown genius
of a high literary and artistic order.

There is, for instance, David Win-
gate, the famous collier poet of Lan-
arkshire. Though Wingate himself
can claim kindred with Robert Burns
in descent, yet his renown as a poet
has come all from his beautiful de-
scription of life and scenery round
Glasgow. These have endeared him
to thousands of Scottish hearts, and
placed him amongst the very foremost
of the minor bards of Caledonia stern
and wild.

Then have we not Mr. Owen Wat-
kinson, A.R.C.O., who is still a work-
ing miner, and cheerily pursues his
calling each day, whilst he trains the
choir and so beautifully plays the
organ in the evenings and on Sun-
days at Daisy Hill, near Wigan?
Mr. Watkinson is a native of the
village, and got his education at the
school there. He went to work in the
pit when little more than a lad, and
his favorite study was music in his
leisure hours. Devoting himself to
this he actually passed the examina-
tion rather more than a year ago, for
the diploma of A.R.C.O., and thus,
amid a shower of congratulations
from even well-known musicians,
took his place as "one of the best"
connected with the College of Organ-
ists.

The colliers have their own novel-
ists, too. Was it not the Chancellor
of the Exchequer himself who wrote
such a glowing letter to this gentle-
man, Mr. Joseph Keating, when that
writer published his second novel,
"Maurice," depicting Welsh life and
customs? The chancellor said, "Your
book is ideal; and it is a pleasure to
me to welcome a book so true to
Welsh life and so very interesting."

More than one clergyman has ac-
tually been a miner before his ability
in writing urged him forward into
other and more prominent paths.
Perhaps the most famous of such
parsons to-day is the Rev. David
Brydon, late vicar of Holy Island, off
the coast of Northumberland, a gen-
tleman who is not only known for his
splendid parochial work, but whose
name is writ large in the records of
brave deeds with the lifeboat.

For the clergyman has often made
one of the crew when a man was
short and perishing sailors were

MARKET REPORTS.

Liverpool and Chicago Wheat Futures
Close Higher—Live Stock—
Latest Quotations.

CHICAGO, June 3.—Irreparable dam-
age, said to have been inflicted on
thousands of acres of wheat in Kansas
and Nebraska, sent the price of the
cereal to-day to a much higher level.
It was declared by experts that the
rainfall which was supposed to have
broken the drought had been altogether
insufficient over a large portion of the
two states named, and that moisture
now for such districts would be with-
out avail. The close was firm within a
shade of the top figures reached, 17½c
to 2c net advance. Corn finished ¼c
to ½c up, oats with a gain of ¼c to
1¼c, and provisions dearer by 27½c to
50c.

The Liverpool markets closed to-day ¼d
higher to ½d lower on wheat, and corn
¼d to ½d lower. Berlin closed ¼c lower
on wheat, and Antwerp unchanged.

Montreal Grain and Produce.

MONTREAL, June 3.—Business over
the cable in Manitoba spring wheat con-
tinues very quiet, but there was a better
enquiry for oats at an advance of 1¼d
per quarter, and sales of several loads
were made for June shipment. The local
trade in coarse grains is quiet. Flour is
dull. Millfeed steady. Butter quiet and
easy. Cheese strong and higher. Eggs
fairly active. Dressed hogs declined 25c
per 100 pounds. Exports of cheese last
week were 31,487 boxes, against 51,330 a
year ago.

Corn—American, No. 2 yellow, 88c.
Oats—Canadian western, No. 2, 55c to
55½c; do., No. 2, 50½c to 51c; extra No. 1
feed, 51½c to 52c.
Barley—Manitoba feed, 65c to 66c; malt-
ing, \$1.06 to \$1.07.

Buckwheat—No. 2, 73c to 74c.
Flour—Manitoba spring wheat patents,
firsts, \$5.80; seconds, \$5.20; strong bakers',
\$5.10; winter patents, choice, \$5.25 to \$5.35;
straight rollers, \$4.80; do., bags, \$2.30 to
\$2.40.

Rolls oats—Barrels, \$5.05; bags, 90 lbs.,
\$2.40.

Millfeed—Bran, \$24; shorts, \$27; mid-
dlings, \$30; moullie, \$30 to \$34.

Hay—No. 2, per ton, car lots, \$20.50
to \$21.

Cheese—Finest westerns, 14½c to 14¾c;
finest easterns, 14c to 14½c.

Butter—Choicest creamery, 26½c to 26¾c;
seconds, 25c to 25½c.

Eggs—Selected, 25c to 26c; No. 2 stock,
17c to 18c.

Potatoes—Per bag, car lots, \$1.70 to
\$1.75.

Dressed Hogs—Abattoir killed, \$12.75
to \$13.

Pork—Heavy Canada short cut mess,
barrels, 35 to 45 pieces, 26c; short cut
backs, barrels, 45 to 55 pieces, 25.50.

Lard—Compound hives, 375 lbs., 10½c;
wood pails, 20 lbs. net, 11c; pure, tierces,
375 lbs., 14½c; pure, wood pails, 20 lbs.
net, 15c.

Beef—Plate, barrels, 200 lbs., \$17; do.,
tierces, 300 lbs., \$25.

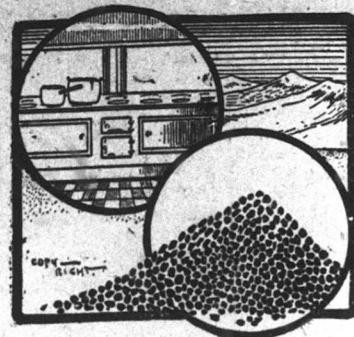

CATTLE MARKETS.

Union Stock Yards.

TORONTO, June 3.—There were 138
carloads of live stock at the Union
Stock Yards, comprising 2318 cattle,
1034 hogs, 239 sheep and lambs, 120
calves and 32 horses.

Exporters.

Mr. Howard bought for Swift & Co. 150
steers, 1250 to 1300 lbs. each, at \$7.85 to \$8
for the London market; also 157 steers,
1200 to 1225 lbs., at \$7.75 to \$8 for the Liver-
pool market.

ied.

by W. R. Lott, seconded by E. R. Sills, that the clerk notify
esworth, Township Engineer, that a requisition of James Mc-
s been filed with him asking that the Engineer appoint a time to
place requested by Mr. McCormick. Carried.
by W. R. Lott, seconded by A. McCutcheon, that George O.
id the sum of \$22.00, being the balance of his year's salary as
2.00 for services on the Board of Health. Carried.

JAMES MKITTRICK, Tp. Clerk.

spending a moment's work, but whose
name is writ large in the records of
brave deeds with the lifeboat.

For the clergyman has often made
one of the crew when a man was
short and perishing sailors were
needing help, and the Lifeboat Insti-
tution has more than once given him
its special thanks for his bravery on
such occasions. A grand example of
the miner at his best is the Rev.
David Brydon, for he will tell you
still that he has a very warm corner
in his heart for those men with whom
he once worked in the mine.

And then, Councillor Thomas Hall,
mayor of Mansfield, Nottinghamshire,
who has been for many years one of
the most respected members of the
corporation there. Mr. Hall is a
Liberal, strong trade unionists, and
a justice of the peace. Yet withal
he is really a working miner, for he
acts as check-weigher at the Pleasley
Collier. But no mayor of Mansfield
has ever been more respected by his
fellows, and few men in the town
have won such a reputation for good
sense, deep sympathy, and hard work
as this excellent specimen of the
miner at his best.

The March of Progress.

The old-fashioned woman who wore
red flannels and turpentine as a pro-
tection for her chest now has a daugh-
ter who wears talcum and a bangle on
hers.

A Catastrophe.

"I don't remember what I ate, but
I had an awful dream."
"What was it, old chap?"
"I dreamed my valet went away
without lacing my shoes."

Not So Bad.

"Did you tell the landlord what an
awful leak there was in the roof?"
"Yes, I told him."
"What did he say?"
"He said he'd fix the roof as soon as
you pay the rent you owe."
"Did he? I guess it ain't much of a
leak."—Cleveland Plain Dealer.

Selby, May 1st, 1912.

Exporters.

Mr. Howard bought for Swift & Co. 150
steers, 1250 to 1380 lbs. each, at \$7.50 to \$8
for the London market; also 157 steers,
1200 to 1325 lbs., at \$7.75 to \$8 for the Liv-
erpool market.

Butchers

The best steers of export quality bought
for butchers' purposes, sold at \$7.50 to
\$7.90, with a very few reaching \$8; mixed
butchers' steers and heifers, \$7 to \$7.40;
common and medium, \$6.25 to \$6.90; cows,
\$4 to \$6.75; bulls, \$6.50 to \$6.75; canner
cows, \$2.50 to \$3.25.

Stockers and Feeders

Feeders, 900 to 1000 lbs., are worth from
\$6 to \$6.25 per cwt.; stockers, 900 to 900
lbs., are worth from \$5 to \$5.75.

Milkers and Springers

Fred Rowntree bought the bulk of the
cows, as will be seen below at \$5 to \$5.5
each.

Veal Calves.

Wesley Dunn bought 100 veal calves, at
an average of \$7 per cwt., or a range of
\$4 to \$7.50. A few new milk fed quality
calves, brought \$8 to \$8.25.

Sheep, Lambs, Calves.

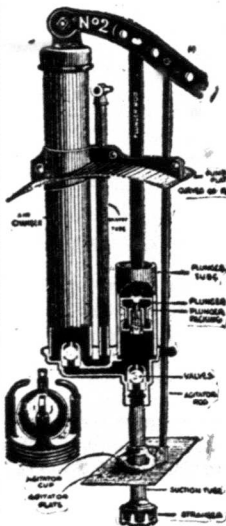

Sheep, ewes, sold at \$5 to \$6 per cwt.;
rams, at \$3.50 to \$4.50; spring lambs, at \$4
to \$6 each, or about an average of \$5
each.

Montreal Live Stock.

MONTREAL, June 3.—At the Montreal
Stock Yards, West End Market, the re-
ceipts of live stock for the week ending
June 1 were 900 cattle, 600 sheep and
lambs, 2500 hogs and 1100 calves. The
supply on the market this morning for
sale consisted of 400 cattle, 125 sheep and
lambs, 1500 hogs and 300 calves.
A stronger feeling prevailed in the mar-
ket for cattle to-day and prices advanced
25 per cwt., owing to the fact that the
run was 300 smaller than a week ago.

I have a full line of **SPRAYING
MACHINES** and **Spraying Chemicals**
on hand for spraying

ORCHARDS POTATOES, Etc.

These are the best and cheapest machines made.
No farmer with an orchard should be without
one of these machines.

If proper spraying is done ninety per cent. per-
fect fruit is guaranteed.

We also guarantee our machines to kill any
field of herrick, no matter how bad, at an outlay of
80c per acre for material.

Hennequin's Infant Tablets

Save Babies' Lives. For Babies and Small Children. (Made in France.)

Dr. Hennequin's Infant Tablets saved our little girl's life. Three doctors said she "cou
not live. The Tablets cured her.—MR. E. R. MCBRIDE, Napanee, Ont.

My baby was so weak from sickness that he could hardly walk. We thought he would
die. We could find nothing to help him. I was given a sample package of three Hennequin
Tablets; we used them; I saw a change at once. We secured the Tablets and our b-baby im-
proved every day, and is now a bright, fat, good natured boy; you could not believe he was the
child. They certainly cured my baby and saved his life. I believe them to be the best
medicine ever sold for babies. Mothers if your babies are not well take my advice and try these
Tablets.—MRS. JAMES RIDDELL, Barrydale, Ont.

We have hundreds of such letters. If the Tablets were not what you need we would not
offer to give them away and prepay them. If your baby is not well send for trial package.
Hennequin Tablets have the letter "H" stamped upon them—this is your guarantee.

All dealers, 25c per package, or 5 for \$1.00 sent postpaid to any address.

SPRING MILLINERY

Make Your Own Hats and Save Money.

LEARN FROM OLD SHAPES.

Try For an Angle or Curve That Is Becoming and Discover the Art of Smartly Crushing and Twisting a Model Into Form.

There are a number of women who dread a visit to the milliner each season as much as they do the semiannual trip to the dentist, and when one considers the hideous hats one sees on every hand one is apt to think that, failing their ideal—in hats as in millinery—the average woman puts up with her opportunity.

She should not do it if she has time to burn and strength to push a needle. Hat making is no great art or mystery. Anybody can learn it, even without a teacher. Begin by taking apart an old hat. Note how the covering is set on the wire frame; also how the wire frame itself is tied together. Experiment after pulling the old hat apart in putting it together. See if you can do it workmanly. It will cost only a little time and eyesight. Then get fresh covered wire for a new frame.

Designed by Ora Cne.

DURBAR TURBAN OF YELLOW STRAW.

fine uncovered tie wire, a milliner's long needle, strong flax thread and a pair of small pliers for twisting wire ends.

Decide what shape and size you want, cut lengths of wire for the headpiece, the crown and the brim. Cut also lengths for joining these circles. The old frame will show you the manner of joining. Fasten with bits of tie wire at the crossings; then with the flax thread sew the lapped ends firmly, but lightly. Cover smoothly with millinet if you intend making the hat proper of silk or any fabric. Millinet also helps in using straw or fancy braid, but makes a heavier hat than if the braid were merely sewed together over the wire shape.

STEAD AND SPIRITS.

The Great Journalist Had Fully Proven Their Existence.

The late W. T. Stead, a victim of the terrible Titanic tragedy, was a firm believer in the occult. He made investigations which satisfied him that the spirit world could communicate with this, and he acted upon his belief. He was laughed at. He was called a fool. What of it? William T. Stead did not care. He had been in prison for his thoughts. He could be jeered at for them.

Impressed with his new belief, and having The Review of Reviews, which he had founded in 1890, progressing rapidly toward success, he founded Borderland, a quarterly devoted to occult philosophy and psychical phenomena. The journal was edited for several years, and it was during this period that there came into being the "automatic hand." And that was exactly what Mr. Stead meant. He insisted that by making his mind passive those at a distance, whether in this world or some other, would move it for him, would make it transcribe on paper their thoughts, their messages. And chief among these persons who sent message from beyond the great divide was "Julia." These messages of the "automatic hand" caused Mr. Stead to announce with absolute conviction that the dead return. For him, it was a "truth established, a problem which is solved, a subject on which doubt is hence forth impossible."

He also states that soon after she slipped out of her body he began to develop various psychic accomplishments, among them automatic writing, and then "I placed my hand at the disposal of Miss Ames, and she has used it as her own ever since." This was their favorite mode of the interchange of thoughts, though they used both clairvoyance and clair-audience also, and Mr. Stead affirmed that she "made good" in them all, although he subjected her to every known test; he did not, however, accord her his unqualified approval or belief in her identity till she gave him convincing proof by both "external and internal evidence."

One of the letters from Julia contained the following sentences: "The world is full of spirits longing to speak to those from whom they have been parted. It is a strange spectacle. On your side, souls full of the anguish of bereavement; on this side, souls full of sadness because they cannot communicate with those whom they love."

"Many on earth are racked with agony because they imagine their loved ones are lost in hell, while in reality they are within the all-embracing arms of the love of God. Something should be done to enable the sorrowing ones on earth to know that their so-called dead live nearer than ever before. It would dry many a tear and ease many a sorrow. What we need is a bureau of communication . . . It is the most important thing there is to do . . . and you can count on the eager co-operation of all on this side."

It was this message from Julia that caused Mr. Stead to open his famous "postoffice for spirits" in London in 1909, where he communicated with persons in the other world.

Fishes That Dance.

There are some giddy doings about this time of the year at the bottom of the sea, according to a writer in

LOSS OF THE QUEUES

EFFECT OF HAIR CUTTING UPON THE CHINESE.

Celestials Without Pigtails Are Now the Rule Rather Than the Exception and It Is Very Dangerous to Enter Streets of Canton With That Ornament In Place—It Is Advertising Fact of Upheaval.

The man who has been following the market in wigs ought to be a better judge of the Chinese revolution than any diplomatist or newspaper correspondent, writes William Maxwell to The London Daily Mail. He alone can say whether the million of Chinese who have cut off their pig-tails have parted with them for good or are hiding them against the day when a pigtail will be again the mark of a patriot. For a pigtail is easily replaced—when you have it. Even in pre-revolutionary days some people were content to fix them to their hats so as not to appear denationalized in public places.

I confess that the Chinaman without his pigtail is a severe disappointment. He outrages my sense of the aesthetic properties. I had fancied that he would carry the sacrifice as gracefully as some of my Chinese friends in the European Legations. I overlooked the saving grace of European clothes—even of despised frock-coat and top-hat. To my infinite displeasure I find that the Chinaman in long blue padded coats looks undignified without his pigtail. And when he adds to the outrage a cloth cap, which is the present fashion—well, he is just hideous.

But every reform demands its penalty. Our Puritan ancestors set this example to the Chinese, and the victorious soldiers of Cromwell did not disdain to be known by the gay Cavaliers as "crop-ears." They, too, laid their hair—and sometimes their heads—on the altar of their country. Doubtless we shall get accustomed to the spectacle of the mutilated Chinaman just as we have ceased to regret the flowing ambrosial locks of Bonnie Prince Charlie. But the transition is painful and the Chinese do not help us to bear the shock, for they insist on changing their clothes as well as their Government.

It is amazing how swiftly the south has discovered that the queue is a badge of slavery and not a national ornament that distinguishes the heaven-born from the barbarian of Europe and America. Those who did not leap to this conversion by the light of nature have been generously assisted by organized bands armed with shears. The pigtail that ventures into the streets of Canton, Shanghai, Nanking, and a hundred other cities, must belong to a man who is weary of life and the new republic.

Who started the movement. From my infancy, which was nurtured on Aesop's fables, I have ever suspected the fox who turned missionary after losing his tail. China may not be acquainted with the great fabulist, but she has antiquaries who are writing letters to the newspapers to prove that before the Manchu Dynasty three centuries ago no self-respecting Chinaman wore a pigtail. "Hair plaits and lapel buttons on the left" was for 2,000 years the popular and official description of the hated Tartar. When

CHEMICALS IN

Why Timber Cut in Winter Than That Cut in Spring

Timber cut in spring is not so durable as that cut in winter. The durability depends on the greater or less density upon the presence of certain constituents in the wood.

Thus a large proportion matter increases the durability the presence of easily soluble salts diminishes it considerably.

During the growing season of trees contains sulphur, potassium, both of which of carbohydrates, starch, gums. They are known to the ligneous tissue to a degree.

During the summer months of living trees contains much sulphuric acid and much potassium as it does winter months. The presence of two chemical substances growing season constitute a factor in dissolving the natural adhesives within the wood and in the wood for the diffusion of wood destroying fungi American.

An Age of Great Gamblers.

The eighteenth century of the great gamblers. 1772, there was a debate of commons on the thirteenth, and it was noticed there very indifferently.

Horace Walpole suggests that: "He had sat up playing at Almack's from Tuesday 4th, till 5 in the afternoon day, 5th. An hour before he had lost £12,000 that he had dinner, which was at 5 o'clock ended losing £11,000. On the 6th he spoke in the above debate dinner at 11:30 at night, from White's, when he drank till morning; thence to Almack won £6,000, and between 3 o'clock he set out for Ne

A Blade of Grass.

As an English writer has said: "Whenever you can find a blade of grass, however small, stand face to face with the life and all the responsibilities of existence. It is of more importance than many of the stars, for, if a right, some stars are ceasing, and therefore, beautiful are from a distance, life upon the sense in which we understand is impossible. The roots of the best blade of grass go down to the beginning of life in the world tip points to the sky. If chance to find a blade of grass in a rocky place carrying water for the sake of the life that spring from it."

HIDDEN TREASURES

An Ancient Church That Guard a Precious Secret

A small building popularly known as "The Church of Hidden Treasures" stands in the little town of N. M. During the Mexican

also helps in using straw or fancy braid, but makes a heavier hat than if the braid were merely sewed together over the wire shape.

Experiment as you go along. It is possible thus to vary the shape almost indefinitely. Try for the angle or curve that is most becoming. Take thought also as to the placing of your chosen trimmings. They ought to look as though at home on the hat—in fact, to have grown with its growth. And they will never, never do it if they have to hang bunched and tremulous over empty space or perched perilously on the verge of a brim which swears at them. Go through the best shops and study models there. Catch as nearly as you may the professional knack of crushing and twisting in place. It is this knack in perfection which makes the great milliner—the man or woman whose name inside is the hallmark of good style. Milliners, like other artists, are both born and made. Make yourself as much a milliner as natural limitations permit. If the early result is something fearful you can at least contribute it to the next missionary box. Making it will have been worth while. Remember Brummel and his handkerchiefs. They were white and starched, of the finest linen cambrics. The proper tying of them marked the man of fashion. A friend once surprised him in front of his glass with a perfect neckcloth under his chin and a snow of crumpled lawn all over the floor. "What are these?" he asked, eying the clutter. Brummel answered airily, "Merely my fallures." He had crumpled twenty cloths to get the effect he wanted. Don't fear to imitate him.

The charming hat pictured is called the durbar turban and is quite within the range of the amateur milliner's province. A fancy yellow braid is sewed over the frame, and clusters of hyacinths are the face trimming.

Two Initials on Silver.

The time honored custom of having the bride's initials only marked on silver that is received as wedding gifts is giving place to the novel fashion of having the husband's initials also appear in the engraving. This is not really new, but a revival of a custom that has long prevailed in Ireland.

The scheme is to have the initials of the husband's surname used and the initial of the given name of both husband and wife. The three letters may be engraved on the silver in the form of a triangle, with the husband's surname letter at the top and the other two letters at the lower corners, with the character "&" between them. Many brides like the idea, and the engravers in the fashionable jewelry stores say they are kept busy making wedding silver in such fashion.

One of the Fallacies.

Clerk—As I am about to get married, I came to ask if you would not give me an increase of salary.

Employer—My dear sir, that is not necessary. You know, a young man always saves money by marrying.

Wool Grease.

Wool grease is obtained by soaking the raw wool in water and washing with soap and carbonates of alkalis. The water is then passed into a centrifugal apparatus which removes the grease from the soapsuds.

Fishes That Dance.

There are some giddy doings about this time of the year at the bottom of the sea, according to a writer in the "Field," particularly among the American bow-fin or mudfish. When warm weather sets in the bow-fin leaves its winter quarters and begins to make good the loss of flesh incurred in the winter; but while the female retains her dull color the male assumes brilliant hues, obviously intended to attract the female. The fins become a bright green, the bronze of the back and sides is brightened up, and various other color decorations are assumed. Contrary to the usage of polite society, it is the female who, in the bow-fin community, often seeks out the male.

In April both resort to a quiet place well grown with water-stumps, affording shelter for nests, the male constructing the nest by working mainly at night.

More curious facts regarding fish were given by Mr. F. Martin Duncan before the Royal Society of Arts, London, recently. He showed a remarkable series of cinematograph films representing the movements of all kinds of fish. There were conger-eels who dance with wonderfully regular movements, and rays who swished about and seemed to be winking at the audience every time they opened their mouths. Perhaps the most amusing picture was that of scallops. When a scallop wants to move it opens its shell as wide as possible, swallows a great mouthful of water—a scallop is all mouth—claps its shell together again, expelling the water, and so move forward with a little hop, its progress being something like that of a jumping bean.

"Queen of Greenstones."

An important discovery is reported of a large outcrop of greenstone in a hitherto unexplored mountainous district on the west coast of the South Island of New Zealand, which is thought to be the original mother reef from which all the greenstone found in that island is derived. It is anticipated that its used will no longer be confined to local souvenir jewelry but will be used for mantelpieces, table tops, monuments, etc., and will also be exported to China, where greenstone, in the form of jade, is regarded with peculiar veneration. The discovery of transparent bowenite, known as "tungwai," the queen of greenstones, near Milford Sound, on the west coast of the South Island of New Zealand, is regarded as one of great importance in mineralogical circles, for it comprises the rarest and most valued quality of greenstone known in New Zealand, and probably in the world.

Miles of Films.

On the average of about 150,000 feet of film are placed on the British market every week, and this quantity is steadily increasing. It is computed that there are some 50,000 picture theatres scattered throughout the world, and as the number thereof is increasing daily, the supply of films has by no means yet reached the limits of the demand.

England's Coal Trade.

England produces in a normal year, 230 million tons of coal; it exported 64 million tons last year and imported only the trifle of 20,000 tons. Therefore its whole manufacturing industry, and its foreign trade to the extent of 182 1-2 million dollars a year, are dependent on the coal trade.

man wore a pigtail. "Hair plaits and lapel buttons on the left" was for 2,000 years the popular and official description of the hated Tartar. When the Manchus overthrew the Mings they rewarded their Chinese adherents by imposing on them the shaven forehead and the queue instead of the "topknot" of the defunct Mings.

As soon as the Chinaman had time to forget how he came to possess this appendix he began to cherish it as a woman cherishes the bracelet which is an ancient mark of slavery. It became more than a personal ornament. It was a visible sign of race, setting him apart from the outer-barbarian and the foreign devils. For a Chinaman to lose his pigtail was to lose more than "face"; it was to reduce him to the level of the barbarian and to disgrace his ancestors.

By the way, I wonder if it is the pigtail that has saved the Chinese from the baldness that afflicts our own short-haired civilization? Until this very day I had never seen a bald-headed Chinaman, and the public spectacle brought my rickshaw boy to a dead stop in the crowded street. He had a vision of the future, and it paralyzed him. I felt that the circumstance was favorable to candid confession, and asked him what he had done with his discarded pigtail. Had he sold it?

"Me keepee home," he replied, with a knowing leer.

Just as I suspected. There has been no "slump" in the wig markets of Europe and America. The Chinaman is keeping his pigtail, and is safe in any emergency, whether Republican or Imperialist. If the Republican cause prevails he will continue to be queueless; if the Imperialists are victorious, he will bring out his pigtail and tie it to his hat or to his growing locks.

An observant philosopher wandering through China might measure the degree of revolutionary fervor by the length of the people's hair. In Canton, where Republicanism is rampant and aggressive, every man and male child is closely cropped. Even the aged have had to adopt the short-haired fashion, for bands of amateur barbers whose shears are supplemented with rifles parade the streets hunting for queues. In Shanghai it is the same. But in Nanking, the headquarters and capital of the Republic. I notice that many of the common folk are a little shy of a barber. "There are no queues, it is true, but hundreds of people are letting their hair grow longer and untidier every day. This may be no proof of want of sympathy with Republican institutions. It is probably nothing more than an insurance against the return of the governor who a few months ago was in the habit of making the head follow the lost pigtail. There are still people in Nanking who remember the fate of the queueless reformers who ventured into the city before it surrendered to the Republican army.

Horrible Examples.

Slang not only becomes English, but sound English becomes slang. When Landor was reading "Aurora Leigh" he wrote to John Forster that it was a great poem, "but there are a few flies on its surface." From that it is some distance to the contemporary lyric:

There are no flies on me.
There may be on you
A bushel or two.
There are no flies on me.

So when the poet Henley complained "there is a wheel within my head" he little knew what a horrible future his metaphor was to see.—Collier's.

TOLD OWN FATE.

In Tale, In 1892, Stead Pictured Col-
lision Between Liner and Iceberg.

Intimate friends of William T. Stead, recall a story which he himself wrote in the Christmas extra issue of The Review of Reviews, London, published in December, 1892, entitled "From the Old World to the New," a chapter of which tallies in almost every detail with the wreck of the Titanic.

Mr. Stead, in this chapter, which is called "Coincidents and Clairvoyance," describes an encounter with icebergs at sea. His characters are a group of English tourists. They are crossing the Atlantic on board the Majestic of the White Star Line. The steamship suddenly comes upon a great iceberg.

The great English writer, long known for his ideas on spiritualism, clairvoyance and mental telepathy, brings all into play in his thrilling story of the high sea, but when he describes the icebergs, fog and conditions of sky and sea and on board the Majestic it would seem that had he been able to send an account of what took place on that fateful Sunday evening recently it could not have been more identical.

"Jack" Compton, a passenger, has the power of automatic writing. Compton receives a telepathic message from John Thomas, a Scotchman, who is an old friend, and he (Thomas) has been saved in the wreck of the Montrose which was in collision with an iceberg. The messages continue to come. Meanwhile Mr. Compton has asked the captain of the Majestic to stop at the iceberg on arrival. The old captain scoffs at the idea. But then his own vessel comes within a hair's-breadth of being wrecked by an iceberg. He stops. Compton, and "the professor" put out in a lifeboat and eventually reach John Thomas, finding him almost dead. They bring him safely to the Majestic just as it seemed that steamship would go under.

The setting of the story and the descriptions of the icebergs and the wreck tally with the tragedy of Sunday night. The time and place also agree with those of that Sunday's catastrophe. It also was on a vessel of the White Star Line, and the captain had under his care just two thousand souls and a cargo worth at least \$2,000,000. Perhaps the only difference was that Mr. Stead's mental telepathy has been replaced with wireless telegraphy.

Striking sentences here and there from other writings of Mr. Stead are also recalled in which it might seem that he had some premonition of his own fate. Especially is this so of a comparison in his book, "How I Know the Dead Return," which has a paragraph beginning, "Let us consider the Atlantic Ocean as the grave." Then the author compares one shore with earth and the other with the Eternal shore.

Pure Food In Ancient Rome.

In Pliny there may be found an account of the manner in which the bakers of Rome were alleged to mix with their dough a white earth, soft to the touch and sweet to the taste, thus putting out a foodstuff that had weight and fine appearance, but little food value. The same writer also touches upon wine adulteration. Pliny says that not even the wealthy Roman noble could be sure that the wine he bought was pure. Indeed, the most famous wines were doctored and

SKOBELEFF'S REVENGE.

Insulted by the Czar the Russian
Hero Tamed His Master.

During the Russo-Turkish war the day after the passage of the Danube had been made good the Emperor of Russia crossed the river to congratulate and thank his gallant soldiers. In front of a long, massive line formed on the slope below Sistova, awaiting the coming of the great white czar, stood Dragomiroff, Yolchine and Skobelev, the three generals who had been the leaders of the successful attempt.

Dragomiroff, the divisional commander, the Emperor embraced and gave him the cross of St. George. He shook hands warmly with Yolchine, the brigade commander, and gave him, too, a St. George to add to the decorations which this cheery little warrior had been gathering from boyhood in the Caucasus and central Asia. Then the Emperor strode to where Skobelev stood, and men watched the little scene with interest, for it was notorious that Skobelev was in disfavor with his sovereign, and yet of him the camps were ringing with the story of his conduct of the previous morning.

Would Alexander maintain his umbrage or would he make it manifest that it had been displaced by Skobelev's heroism? For at least a minute the Czar hesitated as the two tall, proud, soldierly men confronted each other. You could trace in his countenance the struggle between disapproval and appreciation.

It was soon over, and the wrong way for Skobelev. The Emperor frowned, turned short on his heel and strode abruptly away without a word or a gesture of greeting or recognition. A man of strong prejudices, he was not yet able to exercise from his mind the calumnies that had blackened to him the character of Skobelev.

That officer, for his part, flushed scarlet, then grew deadly pale and seemed to conquer an impulse as he set his teeth hard and maintained his disciplined immobility. It was a flagrant insult in the very face of the army and a gross injustice, but Skobelev endured it in a proud silence.

The time soon came to that gallant and brilliant soldier when he could afford to be magnanimous. As the campaign progressed he distinguished himself again and again, so that his name became a synonym in the army for splendid daring as well as for opportune skill.

On Sept. 3 Skobelev after exploit on exploit devised and led the storm of the Turkish position in Loftcha and drove his adversaries out of that strong place. On the following night at his own dinner table in the Gorni Studen headquarters the Emperor stood up and bade his guests to honor with him the toast of "Skobelev, the Hero of Loftcha." It is not given to many men to earn a revenge so full and so grand as that.

Duties of the Claquers.

The claquer has never flourished in English theatres, but is a powerful institution in France, where a "chief de claquer" enjoys a recognized status and makes a comfortable income. It is a mistake to suppose that the only duty of claquers is to applaud. A well organized claquer includes some members who have cultivated the art of infectious laughter. These "cha-touilleurs" attend the lighter forms

DOOMED BY THEIR BOOKS.

Some of the Authors Who Wrote Their
Own Death Warrants.

In 1857 an Austrian pamphleteer named Telki was shot at Gratz for writing and publishing a book reflecting on the good faith of Count Buol, the Foreign Minister. The work was published at 9 o'clock in the morning, at 10 it was ordered to be suppressed, half an hour later the unhappy author was being tried by drumhead court-martial, and before noon he had been pronounced guilty and executed.

Napoleon gave equally short shrift to writers who offended him, shooting some and hanging others with scarcely even the form of trial. One of the most notorious of these judicial murders was that perpetrated at the expense of poor Palm, a Nurnberg publisher, who was shot because he refused to give up the name of the author of a book attacking the usurper. Later the Bourbons had troublesome authors quietly "removed" by hired assassins. After this fashion died the gifted Paul Courier, whose foul murder on April 10, 1825, aroused to fury all lovers of liberty.

Edward Kelly, the friend and champion of Dr. Dee, had his ears cut off at Manchester for writing in defence of that notorious magician.

Daniel Defoe narrowly escaped a similar fate for his "Short Way With the Dissenters," and, as it was, he was three times stood in the pillory, besides suffering all the horrors then incidental to a long imprisonment in Newgate.

A sorry fate befell John Williams, who foolishly sent two samples of spring poetry to King James I.

For safety the unhappy poet inclosed the verses in an iron box, and James, who always feared assassination, jumped to the conclusion that the latter contained some sort of an infernal machine.

When the real nature of the contents came to light the timorous monarch and his counsellors became the laughing-stock of England, and James in revenge caused the unfortunate Williams to be hanged, drawn and quartered.

The Saw of the Mosquito.

The bill of the mosquito is a complex institution. It has a blunt fork at the head and is apparently grooved. Working through the groove and projecting from the angle of the fork is a lance of perfect form sharpened with a fine bevel. Besides it the most perfect lance looks like a hand saw. On either side of the lance two saws are arranged, with the points fine and sharp and the teeth well defined and keen. The backs of these saws play against the lance. When the mosquito alights, with its peculiar hum, it thrusts its keen lance and then enlarges the aperture with the two saws, which play beside the lance until the forked bill with its capillary arrangement for pumping the blood can be inserted. The sawing process is what grates upon the nerves of the victim.

The Worst In the Country.

"Are you the landlord of this hotel?" asked the guest who had his baggage on the porch.

"I guess I be," answered the man with pale eyes.

"Well, I want to hand this little sentiment to you. Your hotel is positively the worst I have ever seen in this country, and I've traveled all over it."

the little town of Barelas, during the Mexican war many of the best families in the neighborhood hid their gold and valuables in the most curious places.

Landoval, a very rich landowner, the thick walls of the village and his treasure vault, according to the writer in the Wide World, and says that the precious hoard had been removed.

Several years ago several groups armed with pickaxes, crowbars and implements, besieged the search of the fabulous wealth concealed somewhere on the

The treasure is believed to be hidden in a large wooden chest, most of the wealthy Mexicans possessed. It is claimed that it contained thousands of dollars besides emeralds, diamonds and set in pure native gold.

Landoval family, however, guard most carefully, while they are jealously watched to see that they do not disturb the church property and daring plans are sometimes made, but nothing seems to come of them and the ancient building still guards its precious secret.

Utah's Lofty Mountains.

The Uinta range is one of the most extensive in the United States. King's Canyon, over above great canyons and amphitheaters, reaching a height of 13,496 and 13,498 feet. Mount Elbert is but slightly less elevated, its altitude of 13,428 feet, while other peaks rise above 13,000 feet. Considered in its past and present position of the Uinta mountains, a fertile country, deeply interglacially, of great economic value, picturesque and beautiful. Westward after long miles of open prairie scenery, the Uintas grandly, while features of the innumerable lakes and made possible by the glacial. From the summit of Baldy for instance, four great balds before the eye. Nestling in the pine forests at least seven may be counted. Scattered in the forests there are also meadows. Above the forests some of the most majestic of the Uintas. — Guy Elliott United States Geological Survey.

Distasteful Taffy.

Senator Hoar of Massachusetts, while at his hotel in Washington, an effusive stranger sat down to him. The stranger introduced himself to Senator Hoar and launched into a eulogy of him in the most glowing terms. The senator for ten minutes, at statesman's apparent dis-

he said: "The other day, senator, whom I was traveling told me the greatest patriot and the greatest orator and the greatest New England ever sent to Congress. He was a well informed man, and he told me only the other day that he was on his way—on his way—can't remember—on his way—

to the asylum," snapped Hoar. — Evening Post.

Carrots Four Feet Long. Some remarkable giant vegetables were exhibited at the Horticultural Hall, London, Eng., a short time ago. There is keen competition for the championship in the art of vegetable-growing between the Duke of Portland and Mr. Vicary Gibbs, and at the exhibition referred to it was generally agreed that the Duke of Portland's exhibit has never been equalled. He showed some carrots four feet long, and as smooth and regular in taper as if they had been cast. Among other vegetables he also showed a number of beans 12 inches long.

Carrots Four Feet Long.

Some remarkable giant vegetables were exhibited at the Horticultural Hall, London, Eng., a short time ago. There is keen competition for the championship in the art of vegetable-growing between the Duke of Portland and Mr. Vicary Gibbs, and at the exhibition referred to it was generally agreed that the Duke of Portland's exhibit has never been equalled. He showed some carrots four feet long, and as smooth and regular in taper as if they had been cast. Among other vegetables he also showed a number of beans 12 inches long.

Bavarian Burials.

Hearse or funeral cars are not used in Bavaria. The dead must be removed from the houses within twenty-four hours after death, the bodies being conveyed to the "dead house," with which every cemetery is provided. The removal is in charge of municipal officers, and by very plain casket wagons, which are owned by the municipalities. Private concerns have no interest in funeral arrangements every detail being under the control and direction of duly authorized municipal officials.

Marriage Penalties.

Much is heard of the taxation of bachelors, but little is ever said of the communities wherein matrimony is deemed a punishable offence. Perhaps the most extraordinary ideas with reference to this subject may be said to be held at Oxford University in England. There, for instance, a fellow of All Souls College forfeits his fellowship if when studying the classics he should take unto himself a wife. In such event he must not only pay a penalty, but must also present his college with a memorial in the shape of a silver cup, with the further condition that on this cup shall be inscribed in Latin, "He backslid into matrimony."

There is an aristocratic club in London, the Bachelors' of Piccadilly, whereof the members who so far forgot their loyalty to the club as to marry are actually expelled and ostracized. The only saving feature of such expulsion is that by the payment of a fine of \$100 the offending one may retain an honorary membership, but so far as active membership is concerned he is strictly out of it for the rest of his life.

There is a similar organization in Germany, the Jungesellen Club. Whenever there comes to the officials of this club any intimation that a member contemplates matrimony he is immediately summoned for trial in the club court, with the president as judge. The culprit is allowed to plead in extenuation of his offence, and upon his skill in presenting such plea depends the amount of his fine, which ranges from \$100 to \$1,000. The humorous feature of the fine consists in the application made. The money is devoted to a dinner, whereat all members appear in mourning attire. At the conclusion of the report the president solemnly reads the sentence of expulsion, and the delinquent is led from the room amid the groans and lamentations of his erstwhile club members.

well organized clique includes some members who have cultivated the art of infectious laughter. These "cha-touilleurs" attend the lighter forms of drama and laugh so heartily and naturally that their neighbors join in and leave the house convinced that the play must be a funny one. Then there are the "pleureuses," who are paid to shake with sobs at the right moment during melodramas. — London Chronicle.

Blooms Under Swiss Snow.

The soldanelas of the high Alpine meadows of Switzerland bore their way up through the coating of ice and snow by means of heat generated by the growing stem. Quite commonly, if the layer of snow is very thick, the flower will open without ever reaching the surface at all. The blossom is in no way affected by its strange surroundings. The space round the stem is, of course, thawed by the growing stem, which gives out heat.

A Mild Argument.

They were having an argument in the station while waiting for a train. "Hubby, do you love me as much as you did when we were first married?"

"Of course I do."

"Seems to me you don't tell me so as often as you did."

"Yes I do. Seems to me you're harder to convince."

As to Eating.

It is a good plan not to eat when you are hurried.

When you are troubled.

When you have no appetite.

When you are laboring under any strain of mind.

When you cannot lay aside every care and give yourself up to leisure by enjoyment of the meal.

Probably So.

"What do you suppose is the real story of Danae's being killed by Jupiter with a shower of gold?"

"Oh, I suppose some husband in those days suddenly showed his wife enough real money to get a decent spring outfit and the shock brought on heart failure."

The Women of Carthage.

There is a grand old story told about the supreme devotion displayed by the women of Carthage. When their city was besieged by the Romans ropes were needed; but, as there was no flax to make them in the city, the women, headed by their heroic queen, came to the rescue. They one and all cut off their glorious tresses and made ropes of their hair.

Gone.

The tightwad went to the pastor. "Mr. Brown," he said, "through a blunder I dropped a \$5 gold piece in the plate instead of a nickel."

"Ah, yes," said the pastor briskly. "A benevolent blunder. But I assure you it will count with us just as much in your favor as if you really meant it."

And he hurried away.

Playing Two Roles.

Towne—Dr. Post is at work on a collection of poems now.

Browne—Nonsense! Why, he's a humdrum old doctor of medicine and never—

Towne—I know, but he is also coroner. He's examining the poems to see what there was in them to induce the editor to shoot the writer of them.

sentiment to you. Your hotel is positively the worst I have ever seen in this country, and I've traveled all over it."

"I know it," answered the landlord. "And I have a kinder pride in it. Lemme tell you something about it. Every time we git beat out a board bill it's sure some satisfaction to know that we got the best of the feller that done it."

Heat From the Moon.

The moon is made of material supposed to be stone, since its specific gravity is about that of the rocks within reach here on earth. It reflects the light it receives from the sun to the earth, but in greatly weakened proportion. Therefore this light will affect plants in the same ratio. The effect is very small indeed. Heat energy sent from the sun to the moon is very nearly the same as that radiated to the earth, but the quantity sent from the moon to the earth is so small that it is negligible.

Literary Taste.

"Say," remarked the hasty individual to the young woman in the book department, "have you a novel about a girl with slate-colored eyes?"

"I don't recall one just now," she said, "but we have a very good novel by Harold Grinders about a girl with tawny hair."

"Is her picture on the cover?"

"Yes, sir; drawn by James Montgomery Twisty."

"Well, gimme that."

The Rocky Road.

"Some of those railway roadbeds are pretty rough," the commercial traveler remarked. "I remember on one occasion ordering some fried eggs for breakfast in the dining car. After I'd waited awhile the colored waiter returned and said: 'Sorry 'bout dem fried aigs, boss. De cook says de road's so rough dat eberty time he tries to fry aigs dey scrambles.'"

Something Like a Coat.

A remarkable coat was that of Mr. Bright, an Essex (Eng.) grocer, who scaled 616 lbs. His size was such that the coat could easily be buttoned round seven full-grown men. Mr. Bright was one of the heaviest men ever born, and Daniel Lambert only beat him by 31 lbs.

Greatest Meat Eaters.

Australians and New Zealanders are the greatest meat-eaters in the world. The former eat 262 pounds of meat a year each, and the latter 212 pounds, while the British only eat 105 pounds.

A Compensation.

Admiring Relative—We all think the baby's got dear Jane's nose.

Crusty Old Bachelor—Glad of it. Then she can't go poking it any more into other people's business.

Had No Kick Coming.

An old gentleman who was in the habit of imbibing too freely was sitting one day on the veranda of a village hotel at which he was a regular boarder. When dinner was ready the dinner bell, a large one such as are used on farms, began to ring. A large dog happened to be passing by just then, and, hearing the bell, he stopped and raised his head as high as he could and howled nervously until the bell ceased ringing. The old gentleman looked at the dog a moment as if disgusted with the noise he was making and then said:

"What are you howling about? You don't have to eat here?"

A Range should be a permanent investment, and guaranteed as such. The "Pandora" is fearlessly guaranteed by dealers as well as by the makers, simply because they know that it will give utter satisfaction. Can you wonder that so many people buy

TIME'S REVENGES.

Men Who Were Martyrs To-day and Heroes To-morrow.

There has seldom been a better case of Time's revenge than the one witnessed in Westminster Abbey the other day, when a lovely stained glass window, representing scenes of Bunyan's "Pilgrim Progress," was unveiled by the dean. There was a time when Bunyan was a proscribed man and his Allegory a despised book, the production of a Nonconformist ex-tinker. It was written in Bedford Jail, where Bunyan was lodged for refusing to obey the law which forbade him to preach. He and his immortal work are to-day not only the special glory and boast of the Baptist Church to which he belonged, but the pride of every church which calls itself Christian and can also recognize good literature.

Within a stone's throw of the place where this interesting event took place stands a statue which represents another case of Time's revenge. This is the statue of Oliver Cromwell, which stands in the moat-like hollow beside old Westminster Hall. When the Restoration of the Stuarts took place the Protector's body was taken out of its resting-place in the Abbey and his head severed and stuck upon a pike at the door of that same Westminster Hall that all might make mock at it. Yet it is not the statue of the King which now adorns this site, but the monument of his conqueror.

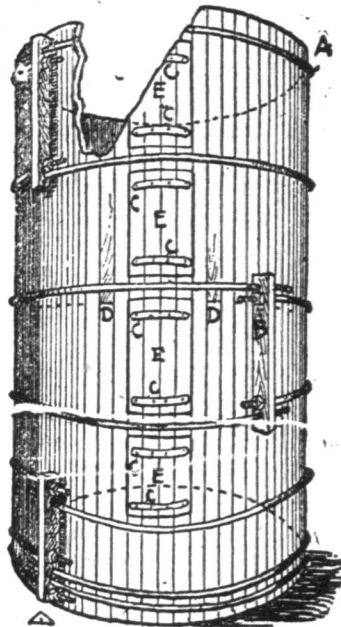

At Gloucester there is a beautiful monument to Bishop Hooker, which stands to-day upon the spot where he was burned to death for his adherence to his religious opinions in the reign of Mary I. Another such monu-

MAKING A STAVE SILO.

Directions For Building This Safety Deposit Vault For Stock Food.

We have had so many inquiries for specific instructions as to the manner of constructing a stave silo that it has seemed necessary to have drawings made to illustrate the most important items, said an article in Hoard's Dairyman printed several years ago and recently reproduced in that paper. The cut on this page is intended to represent a silo sixteen feet in diameter and twenty feet deep. The hoops are of five-eighths inch round iron, two

STAVE SILO.

[From Hoard's Dairyman.]

at the bottom, then one two feet above, another three feet above the last, and so on, the spaces increasing regularly to the top. Each hoop is in two pieces, and these pieces are joined in the rear just the same as in front—by passing through hardwood blocks, as shown, with washers and nuts, so as to loosen or tighten, as may be necessary.

The staves should be two inches thick and may be four, six or eight inches wide, but the narrower they are the better. It is not at all necessary that they should be twenty feet long, as they may be easily spliced. Saw into the ends that are to come together and insert a narrow piece of galvanized sheet iron, say, two inches wide and as long as the staves are wide. Neither is it necessary to bevel the staves, but set them up with the inner edges close together and they will swell and make a tight joint. Many prefer to bevel the staves and set them together with dowels.

Doors for taking out the ensilage are provided for every space except the lowest. These doors need not be cut

ADVICE ON FLOWERS.

How Various Sorts May Be Planted to Get Best Results.

For a sunny exposure the California poppy, *eschscholtzia*, will endure mid-summer heat and drought without finching. The colors vary from pure white through yellow and orange to scarlet, with the satin sheen peculiar to the poppy tribe, while the foliage has a whitish cast which is especially in harmony with the blossoms.

For a boutonniere there are few blossoms which equal the old fashioned bachelor's button in white and the various shades of blue. It has the happy faculty of keeping fresh for hours and of never becoming unsightly, even when wilted.

For rapid growth the kudzu vine excels, well established plants sometimes attaining a height of fifty feet in a single season and furnishing a dense shade. If grown from seed, ten or twelve feet is perhaps the limit the first season.

The calandula will endure more frosts without complaint than any other annual, offering a pleasing variety of the different shades and combinations of yellow.

If you wish to conceal the garden fence plant sweet peas or a row of hollyhocks.

Portulaca is fine for covering a sunny spot, the succulent foliage being a most successful resister of drought.

The calliopsis is showy when grown in masses, the long, slender stems rendering it admirable for cutting.

The branching varieties of aster are preferable to the compact sorts. Lavender and white make a charming combination, while pink appears without a rival for third choice.—Ideal Homes.

AGRICULTURE.

Agriculture, the oldest of occupations, is also the most important. The value of that which comes from the soil surpasses in value all else that is produced by human labor. The prosperity of the farmer is coincident with the prosperity of the nation, and fundamentally the welfare of all the people depends upon the cultivation of the soil.—Governor Hadley of Missouri.

DANGER TO POTATO CROP.

Agriculture Department Issues Warning Against Use of Foreign Seed.

Although home grown seed potatoes are selling at high prices, foreign grown potatoes should not be substituted for them. The following statement on the danger to the American potato crop from the use of imported seed potatoes is issued by the secretary of agriculture:

Europe has several potato diseases not now known to exist in this coun-

Tennis the Game of I

Tennis is the game of king est of existing ball games- tioned in the Arthurian rou nis was originally the pas kings and nobles, and it v

ment to Bishop Hooker, which stands to-day upon the spot where he was burned to death for his adherence to his religious opinions in the reign of Mary I. Another such monument is the Martyrs' Memorial in front of Balliol College, Oxford, where Ridley and Latimer were burned at the stake.

As the visitor to London proceeds from the Parliament Houses up Whitehall he passes the Banqueting Hall of the palace which gives the thoroughfare its name. From one of the windows facing the road Charles I. stepped upon the scaffold on which he lost his head. Yet a few score yards higher up the road stands a statue of the Martyr King, as he is sometimes called, which many good judges consider the finest statue in the Metropolis.

Bunyan's window in the Abbey has for neighbor another similar instance of time's revenge. Just round the corner, in the nave, is a beautiful monument to John and Charles Wesley, both of whom would, in their lifetime, have been prevented from preaching within those hoary walls. It is seldom, too, that a Sunday passes without one or more of Charles Wesley's hymns being included on the hymn sheets distributed to visitors.

Probably every native of a big town in England or Scotland could quote cases in which the townspeople have hooted and persecuted and half-killed some poor fellow, whilst their descendants have seen fit to adorn the principal square or the public park with his statue. One such case occurs at Bolton, where the statue of Samuel Crompton is seated in stone in the principal thoroughfare. Yet it is only about a hundred years ago that this man whom his fellow-citizens delight to honor was chased through the same streets by a murderous mob, which, failing to take his life, smashed his machines to atoms—machines which have brought millions and millions into the national exchequer.

Turning the Tables.

Many are the good stories told of interviews which took place between chancellors and clergymen suing for preferment. A clerical applicant who was sustained by Queen Charlotte's personal favor and intercession with Thurlow felt so sure of obtaining the valuable living which was the object of his ambition that he regarded his interview with the chancellor as a purely formal affair.

"I have, sir," observed Lord Thurlow, "received a letter from the curate of the parish to which it is my intention to prefer you, and on inquiry I find him to be a very worthy man. The father of a large family, and a priest who has labored zealously in the parish for many years, he has written to me—not asking for the living, but modestly entreating me to ask the new rector to retain him as a curate. Now, sir, you would oblige me by promising to employ the poor man in that capacity."

"My lord," replied Queen Charlotte's protégé, "it would give me great pleasure to oblige your lordship in this matter, but, unfortunately, I have arranged to take a personal friend for my curate."

His eyes flashing angrily, Thurlow answered:

"Sir, I cannot force you to take this worthy man for your curate, but I can make him the rector, and he shall have the living, and be in a position to offer you the curacy."

And forthwith, to the applicant's inexpressible surprise and chagrin, the chancellor's words were carried out.

staves and set them together with dowels.

Doors for taking out the ensilage are provided for every space except the lowest. These doors need not be cut out until the last thing and then should be cut beveling at the top, bottom and sides, largest all around on the inside. A strip of building paper tacked around the edges will supply the waste of the saw. The pieces forming these doors should be firmly and permanently fastened together by cleats or bands.

In the diagram A represents one of the hoops, B one of the blocks through which the ends of hoops pass for tightening, C the cleats for holding the doors together, D a splice in the staves and E the doors. To erect such a silo build a foundation some six or eight inches larger than the diameter of the silo and high enough so that the earth may be graded up so as to turn all surface water from the structure, level the top of wall and set up the staves, using lath or any thin stuff to hold them in place until some of the hoops can be put on and tightened. After the silo is filled and has swelled and settled to place permanently bank up on the outside at the bottom with cement.

Put on any sort of roof to suit fancy—even to poles and straw.—Hoard's Dairyman.

Under each acre of good soil there is another acre better than the one which has been used so long. Go down to that new acre this year.

Among the Chickens.

If you would have an egg to hatch make the mother of that egg scratch, for the light of life in the egg will pale if the hen gets lazy and fat and stale.—Rural New Yorker.

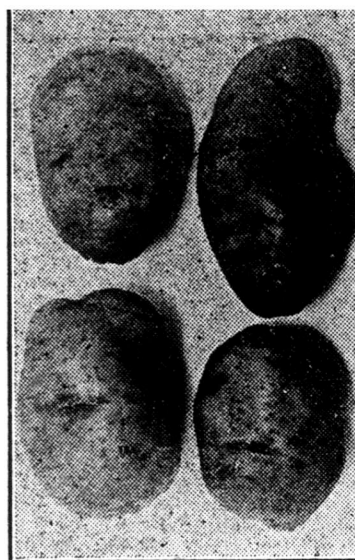

Drinking vessels placed in the hen houses should be put on a shelf that is raised at least six inches from the ground or the fowls will scratch a lot of dirt into the water.

Ducks are fond of a mash, and it usually constitutes the bulk of the food given to them. When grown, however, except in the egg laying season, they thrive and do well on a mixed grain diet, fed dry, if access to a stream is given.

There is nothing better than soda water for fowls whose droppings are not in normal condition. The soda water is made as follows: Use three heaping teaspoonfuls of soda (bicarbonate) to one pint of water; shake well. Dose, teaspoonful to each afflicted fowl. Follow with a one grain quinine pill each night for three nights in succession.—Farm Progress.

A New Trade.

It is difficult nowadays to hit upon a new means of earning a livelihood, but there is a man going about from door to door in South London who seems to have succeeded in the attempt. He carries a pot of Brunswick black and a brush, and offers to reblack your door-knocker and letter-box for the small charge of a penny. The very novelty of the idea commends it to the average housewife, and, judging by the appearance of the knockers in a street where he had been at work, pennies were evidently readily forthcoming.

SMOOTH SKINNED POTATOES RAISED FROM TREATED AMERICAN SEED.

try, which if introduced might be the means of greatly reducing our annual yield of potatoes. Should these diseases become prevalent throughout the United States the cost of producing future crops might be very greatly increased.

Do not, therefore, under any circumstances use foreign grown potatoes for seed, either at the north or at the south. The sorts which are coming to this country at the present time are late sorts and are not adapted to planting in the south, where early potatoes are the main crop. Neither are they adapted to planting at the north, for they will not produce a satisfactory yield.

They are not adapted to our soils or to our climate and will not yield profitable crops, but the danger of introducing diseases not now present is sufficient reason for refusing to plant them.

More Canned Corn Used.

The consumption of canned sweet corn is rapidly increasing in this country. The figures collected by the National Canners' association show a threefold increase for the last ten years. The fear of ptomaine poisoning and of injury from various bacteria is no longer felt and there is little or no danger from these sources.

The Leaf Butterfly.

For protection from its enemies—such as birds, snakes, lizards, etc.—this butterfly, which is to be found in Assam, India, imitates exactly, both in formation and coloring, the leaves of the tree it inhabits. When its wings are extended, this butterfly measures about 4 inches from tip to tip, and is of a most brilliant blue color. It affords a striking example of the wonderful powers given to these small insects for their own preservation.

Donkey and Zebra Too.

A curiosity, which may be seen at the London Zoological Gardens, is a cross-bred animal, its sire being a Somaliland wild ass and its dam a beautifully marked zebra. The stripes do not extend higher than the legs, while the markings on its back and shoulders form the crosses so noticeable in every member of the ass tribe. The animal makes a noise which sounds like the bee-haw of an ordinary donkey.

Tennis is the game of kings—the most of existing ball games—mentioned in the Arthurian romances was originally the pastime of kings and nobles, and it was for its descendant—lawn tennis—came popular with all classes game reached England from Italy, and by the time of Henry VII. we find a royal tennis court at Windsor. Henry VIII. was at the game.—London Chronicle.

The Goat.

"Why do you insist on keeping a man as a member of your bunch? He plays a wretched game."

"That's the point. Each of us is always hoping that he can be the other fellow's partner."—London Star.

A Hint.

FORECAST OF FASHION.

You were never too young— You will never be too old—to enjoy the Edison Phonograph

The Edison Phonograph is not
only the greatest musician of all
the ages—it is all the great musicians
of the present day—playing all of
the greatest music ever written.

You select your program to suit
your audience when you own an
Edison Phonograph. The songs you
love best, sung by the singers who
sing them best—your kind of music,
rendered as only the Edison can

render it—as true to life as the
original.

The Edison tone is pure, smooth,
subdued and true, because of the
rounded, button-shaped sapphire re-
producing-point, which gives exactly
the right volume of sound for the
home. And the sapphire point is per-
manent—lasts forever. No changing
needles, no scratching or wearing of
records.

There are Edison dealers everywhere. Go to the nearest and
hear the Edison Phonograph play both Edison Standard and
Edison Amberol Records. Get complete catalogs from your
dealer or from us. Edison Phonographs, \$16.50 to \$240.00.
Edison Standard Records, 40c. Edison Amberol Records (play
twice as long), 65c. Edison Grand Opera Records, 85c. to \$2.50.

Thomas A. Edison
INCORPORATED
100 Lakeside Avenue
Orange, N. J., U. S. A.

R. B. ALLEN, - Market Square.

LITTLE INVENTIONS.

Simple Devices Which Have Earned
Millions.

Keep your eyes open and do not
regard the simplest contrivance as too
insignificant for serious attention.
That undoubtedly is the lesson which
is to be learned from the history of
inventions, many of which, although
seeming but trifles in themselves,
have earned fortunes for those who
have been clever enough to evolve them.

Take, for instance, the crinkly hair-
pin. The man who made a fortune
out of the idea—for millions of wo-
men bought them when they were
once placed on the market—stood be-
hind his wife one day while she put
up her hair. The hairpins of those
days were straight, smooth pieces of
wire, which had an irritating way of
coming out. The woman, in this
case, was resourceful and bent her
hairpins before putting them in. Her
husband saw her do this, and it gave
him an idea. The result was the in-
vention of the crinkly hairpin.

And then there was the man who
invented the patent dress-hook with a
hump. Women had been fastening
their dresses up with hooks and eyes
for a generation, but hooks had a way
of coming unfastened, much to the
chagrin of the neat. Then came the
widespread man who bent one of these

THE ADOPTION DANCE.

Curious Ceremonial of Taking a Child
Into a Shawnee Tribe.

The adoption dance is one of the
ceremonial dances of the Shawnees.
This is quite different from any one
of the festive dances. They come
many miles around and camp. Their
faces are painted and their persons
decorated with beads.

They dance all day and night with-
out eating. A bonfire is built in the
center of the camp, and they dance
around this. The fire is kept burning
about the same all the time. This
serves also as their light.

The adoption dance is rather quiet,
more so than the other dances. The
women do most of the singing, says
a writer in the Red Man, and sing
very low. They dance around the cir-
cle in twos. The men dance together
in front and the women together in
the rear.

The two leaders in front are usually
the ones who are adopting the child.
They carry tin pails. In these are
rubber balls, which bounce and keep
time with the drummer. This is all
the music they have to dance by. If
a large crowd is assembled they may
have two or three drums.

At these dances good order is kept.

the game of kings. The olding ball games—it is men- e Arthurian romances—tenu- ginally the pastime of the obles, and it was long be- scendant—lawn tennis—be- lar with all classes. Malleability of Gold.

The malleability of gold is so great that a single grain may be divided into 2,000,000 parts and a cubic inch into 9,523,809,523 parts, each of which may be distinctly seen by the naked eye. A grain and a half of gold may be beaten into leaves of one inch square, which, if intersected by parallel lines drawn at right angles to each other and distance only the one-hundredth part of an inch, will produce 25,000,000 little squares, each of which may be distinctly seen without the aid of a glass.

hump. Women had been fastening their dresses up with hooks and eyes for a generation, but hooks had a way of coming unfastened, much to the chagrin of the neat. Then came the wideawake man who bent one of these hooks so as to make a hump in it. He tried hooking it up, and found that it remained hooked, patented the idea, and the "See That Hump" hook advertisements, which are to be seen in every town, earned him a fortune.

The bath-towel was invented by accident. A towel manufacturer found that his machinery was not working right, and that his towels were suffering a vast tangling of ends. While adjusting the machine he used one of the towels to dry his hands. He found it pleasantly absorbent, and from the idea to which that gave rise was born the bath-towel and a fortune.

A man named Heaton noticed that much trouble was occasioned, especially to mothers, because the buttons would come off the children's boots. He thought out and patented the little metal staple that holds on the shoe buttons of to-day, and realized a fortune for his pains. Another man pasted little rings round the holes of tie-on labels and thus made an eye that would not tear. Thousands of travelers have been saved the inconvenience of luggage going astray through torn-off labels, and there are fewer unclaimed parcels lying at the postoffice since his little invention came into general use. This inventor also made a fortune.

The man who invented "tinned" edibles also made it necessary for someone to invent a tin-opener. A tin-opener is not a very difficult thing to use, yet the public will always pay for an invention that is still easier. So just recently an inventive genius brought out a patent "tin" with a seam just below the top. A smart blow breaks the seam, and the lid is off. A single packer ordered 10,000,000 of these tins as an experiment, and others followed suit.

Wearing the Wedding Ring.

Centuries ago women used to wear their wedding rings on their thumbs, then the custom changed and they wore them on their first fingers, and then again the custom changed and the method of to-day came into vogue. The custom of wearing the ring on the third finger originated through the ritual of the marriage service. The priest first put the ring on the thumb, saying, "In the name of the Father"; on the forefinger, adding, "in the name of the Son"; on the second finger, repeating, "in the name of the Holy Ghost," and on the third finger, ending with "Amen," and there it stayed.

A Possible Explanation.

Junior Partner—Slowpay has made an assignment, but he says the creditors won't lose anything.

Senior Partner—Perhaps he means that they wouldn't have got anything anyhow.

Classified.

"This is a sweet state of affairs!" growled the fat woman in the crowded car.

"Well," admitted her companion, "it is something of a jam."

Paper Bag Cookery.

It is not a fad, but the most sanitary and economical way of cooking roasts, steaks, etc., etc. Give it a trial. For sale by

M. S. MADOLE.

rubber balls, which bounce and keep time with the drummer. This is all the music they have to dance by. If a large crowd is assembled they may have two or three drums.

At these dances good order is kept. No drunkenness is allowed. The dance is in a grove, and if any one does not behave decently they tie him to a tree for the rest of the dance. After the dance they have a great feast, which lasts all day, and visitors and all others who attend the dance are invited to partake of the feast.

MUCH OF LITTLE.

A London Sign That Seems Queer, but Is Entirely Correct.

The stranger in any city half a hundred years old, if he knew nothing of the city's history, would learn from many of the business signs that the second and third generations had succeeded to the business of father and grandfather.

A Londoner who had strolled about the streets of Gotham with a New Yorker, who called his attention to some of the signs of sons, agreed that in this respect New York was very like London, but in neither city was there any such sign as he saw in one of the old English towns a few hours' run from the British capital. The sign reads:

JOHN LITTLEJOHN'S SONS AND
LITTLE (LITTLE LITTLEJOHN,
DOOLITTLE LITTLEJOHN AND
JOHN LITTLE).

According to the Londoner, the first Littlejohn and Little were partners. The former gave his first son his partner's Christian name. Littlejohn's second son was named for his mother's family, Doolittle. The three sons succeeded to their father's business; hence the sign is entirely correct, and the Londoner was right in saying that the successors had no intention of being "funny" when they had their sign written as it appears.—New York Press.

Napoleon's Carriage.

The carriage in which Napoleon I. made his famous retreat from Moscow and in which he as emperor general set out from Paris in the campaign which closed at Waterloo is preserved in London by the trustees of the Wellington estate, the relic having formerly been the property of the "Iron Duke." It is a two seated conveyance, with the top and sides lined with iron. There is also a front "curtain" of iron that can be raised and lowered at will. The wheels are large and heavy, and the steps are finished in curious battle designs done in silver. The emperor used the back seat and kept his pillows and blanket under it. The back of the front seat was used as a cupboard and was provided with all sorts of culinary articles and a small spirit or oil stove.

NEWS TOPICS OF WEEK

Important Events Which Have Occurred During the Week

The Busy World's Happenings Carefully Compiled and Put Into Handy and Attractive Shape for the Readers of Our Paper—A Solid Hour's Enjoyment.

WEDNESDAY.

Two boys were drowned off a raft near Findlater, Sask., yesterday.

Burglars blew the safe of the post-office at Hagersville, but were frightened away without loot.

Seymour Daniels of Elmdale, Ont., was killed by lightning on a towboat on the Lake of the Woods.

Dr. W. Beattie Nesbitt was further remanded for eight days in the Toronto police court yesterday.

Rudolph Hamelin was drowned in Riviere des Prairies, Quebec, his rowboat upsetting in the rapids.

William Hearst was killed by falling down the elevator shaft at the Canada Life building, Toronto, yesterday.

Twelve new churches are to be built by Toronto Presbyterians. They are for the rapidly growing suburban sections.

General Booth of the Salvation Army is suffering from inflammation of the eye, which jeopardizes chances of his recovering his sight.

W. H. Greaves, professor of public speaking in Queen's University, has been appointed to the chair of elocution at Victoria University, Toronto.

Princess Patricia yesterday afternoon pressed a button that set in motion the new 12,000 horsepower unit in the Toronto-Niagara Power House at the Falls.

The open sessions of the commission which has been investigating the United Shoe Machinery Co. of Canada under the Anti-Combines Act, came to an end yesterday afternoon.

The police say that the body of a new-born child found on St. Francis street, Quebec, last Sunday was alive when abandoned, and that it was run over and killed by an automobile.

The Government steamship Earl Grey is at present being fitted to accommodate the Duke of Connaught and the royal party, who will make a month's trip around the Maritime Provinces.

THURSDAY.

Kingston merchants are suffering a great deal from shoplifting. Jewelry stores have been hit most.

Lord Montague, of Beaulieu, a member of the British House of Lords was a guest of the U. S. Senate yesterday.

Waterloo County's oldest resident, Joel Good, passed away yesterday afternoon at Waterloo at the advanced age of 96.

Sheriff Flintoff of Sarnia was yesterday notified by the Department of Justice at Ottawa that the hanging of the Indian Kyoshk, has been postponed until November 12.

Richard Harding Davis, author, playwright and war correspondent, was sued for divorce in the Superior Court at Chicago yesterday, by Mrs. Cecil Clark Davis, who alleges desertion.

Fire yesterday afternoon gutted the Law Exchange, a six-storey office building at the corner of Niagara and Franklin streets, Buffalo, entailing

tiary yesterday. He expressed himself as well pleased with the way things are managed there.

The siege of the city of Fez by the Moors is drawing closer, but the defence of the capital is assured. The French column is preparing to take the offensive against the Moors.

The infant son of Hugh MacDonald Thompson pulled a kettle of hot water over himself and was scalded to death at Kingston yesterday. The water was on the fender of the stove and the little tot pulled it over.

W. A. Boys, of Barrie, yesterday was nominated as the Conservative candidate in South Simcoe. The bye-election to fill the vacancy caused by the elevation of Houghton Lennox to the bench will be held on June 17.

Kingston had a short visit from the Duke and Duchess of Connaught and Princess Patricia yesterday. They arrived from Guelph at 7.15 a.m., and then boarded the steamer Lady Grey on a trip down the river to Prescott, later proceeding to Montreal.

MONDAY.

The sudden high temperature of Saturday caused the death of Chas. Swinson, an elderly man, in Toronto.

Two brothers, S. W. and Frank Hogan, recently from Ireland, were killed in the C.N.R. tunnel at Yale, B.C.

Three children were killed Saturday as the result of an attack by a rattlesnake on an hen house on the farm of George Adams, Greenville, N.C.

Rev. Canon E. Loucks of Picton yesterday celebrated the 54th anniversary of his entrance into the ministry. He is 83, and still in active work.

The Ottawa and New York Railway has settled the wage dispute of its machinists and shop laborers at Ottawa by granting an increase of 10 per cent.

The entire business section of Sandy Lake, Pa., was destroyed by fire early yesterday, causing a loss of about \$100,000. Boys smoking cigarettes in a lively stable caused the fire.

Mr. William MacKenzie says the Canadian Northern expects to finish their transcontinental line by 1914, and that they will double-track their line from Winnipeg to Port Arthur.

The New Brunswick Government Saturday nominated Hon. H. F. McLeod, James K. Pender, John A. Young and Dr. A. E. Moorehouse to contest York County in the provincial elections.

All the graves of the men who were killed in the Fenian Raid were decorated yesterday by the Veterans' Associations of Toronto. Yesterday was the 46th anniversary of the Battle of Ridgeway.

The Kingston Penitentiary accountant yesterday received a large number of checks from Ottawa for \$100 each, made out in favor of all officers and guards who receive under \$1,000 salary or wages.

It is reported that a battle at Mayala, Cuba, on Friday resulted in a complete victory for the Government troops. One hundred and twenty-seven rebels and 18 women who had encamped with them were killed.

TUESDAY.

J. J. McDonnell was drowned while bathing near Alexandria.

The building of the ladies' college at Ottawa has been sold, and will be converted into a hotel.

Three public school principals of St. Thomas have resigned to accept better salaries elsewhere.

Mr. B. A. Mitchell, who died at London, Ont., had carried on a drug business there for 66 years.

E. G. Hemmerde, K.C., was return-

To Supplant Finch.

Guelph, June 4.—The fire and light committee of the City Council have considered the forty applications for the position of fire chief and firemen. There were some hot words, and the report, as it will be presented to-night, will not be a unanimous one.

Chief Finch was not recommended for reappointment, but in his place Charles Chase, who has been a member of the Guelph fire brigade for 27 years. It is also proposed to do away with the call men altogether and add four more paid men to the present staff, making ten paid men and one chief. The committee are divided on both propositions.

G.T.R. Can Reach Boston.

Boston, June 4.—The bill which would permit the extension of the Southern New England Railroad

BARRIE TAKES

Bylaw Is Carried With Votes Against

Debenture of \$7,000 Will Be Raised to Extend the Electric Plant For the Distribution to All Parts of the Town. The Bylaw Will Begin at Once to Feed Line Into Barr

Barrie, June 4.—The H bylaw was carried here only 42 votes being recorded. Another bylaw for the debenture of \$7,000 for the distribution of the Hydro all parts of the town was carried, with only 46 negative votes. The third bylaw to expend \$25,000 on permanent roadways carried a majority of only 97.

This latter sum will be used on building a tar macadam one mile in length, between Six, Allendale and Elizabeth. This is one of the main arteries of the town, and is used for automobile traffic. The main roadway leading from the town to the north. Another line to the east end will be great and made into a beautiful driveway and walk.

The Hydro-electric line immediately lay out the line from Waubesa to the town. It is expected that the street will be illuminated and factory driven by power over the lines, from the Severn in the middle of September. The electric light commissioners a canvas of the power available to dispose of nearly 700 horsepower to be G.T.R. for their divisional and private lighting. The Board of Trade and the I will inaugurate a campaign new industries.

No Need to Br

Los Angeles, Cal., June 4.—Arrangements of Clarence for the former McNamara trial accused of having for the McNamara brothers guilty had been made by the conclusion of the alleged bribery of Juror Geo. Wood, was indicated by a special session of the court for the purpose of investigation of the alleged jurors by the McNamara was the only important in the trial of Darrow yesterday. The grand jury session called by a member of the prosecution a "fishing expedition" result in the return of verdicts against persons charged with complicity in unlawful operations of the defence.

Robbed Policeman's

Toronto, June 4.—Evening spectators are not immune from marauders. One known man on the local Inspector John Mulhall, street, was visited Sunday by these gumshoe artists. They left were a few footprint scratches on the wall.

Yesterday afternoon gutted the Law Exchange, a six-storey office building at the corner of Niagara and Franklin streets, Buffalo, entailing a loss conservatively estimated at \$50,000.

Simon Bolitho of Niagara Falls was yesterday given three years in Kingston Penitentiary for setting fire to the house in which his wife lived. Mrs Bolitho has been estranged from Simon for some time.

The whole of the street car employees in Lisbon, Portugal, struck work yesterday morning, the men demanding the reinstatement of several workmen who had been discharged. The service is paralyzed.

FRIDAY.

Hon. G. E. Foster leaves to-day for England to attend the Imperial Conference.

R. F. Green, Conservative, was elected by acclamation in the Kootenay, B.C., bye-election yesterday.

The new Grand Trunk management has assured Hon. T. W. Crothers that all the strikers will be taken back.

Mrs. J. B. Willmott was elected president of the Methodist Women's Missionary Society of the Toronto Conference for the sixteenth time.

The Hamilton Methodist Conference at Woodstock, and the Western Association of Baptist Churches, have both endorsed Mr. Rowell's "banish the bar" policy.

The U. S. House steel and iron tariff revision bill passed the Senate, repealing the Canadian reciprocity act and putting a universal duty of \$2 a ton on print-paper.

A municipal lodging house is being advocated by Medical Health Officer Hastings for Toronto, as a solution to the unsanitary conditions which prevail in many of the poorer class of boarding houses.

The Dominion Mining & Exploration Co., with a paid-up capital of \$2,500,000, is being formed by a number of leading Canadian and American financiers, to investigate mining and other propositions in Canada.

SATURDAY.

Chief Engineer Cowie pronounces Montreal harbor the best equipped in the world.

A cable from Paris says: "La Presse reports that the famous 'Mona Lisa' has been found."

Forty million dollars will be spent by the railways in Montreal within the next two or three years.

Mr. Justice Laurendeau of Montreal has refused to accept the evidence of E. H. Ford, an agnostic, in a civil suit.

Hon. C. J. Doherty, Minister of Justice, visited the Kingston Peniten-

Mr. B. A. Mitchell, who died at London, Ont., had carried on a drug business there for 66 years.

E. G. Hemmerde, K.C., was returned for Northwest Norfolk, England, at the bye-election yesterday.

The Rt. Rev. John H. Sheepshanks, Bishop of Norwich, Eng., from 1893 to 1909, and noted writer, died yesterday.

A fierce encounter took place at Fez between the French garrison and the tribesmen, 600 of the latter being killed.

"I am feeling stronger than when I left England and hope soon to be myself again," said Sir Charles Tupper on his arrival in Vancouver.

After a searching investigation the Government finds the dredging contracts let by Hon. Wm. Pugsley all right, and will renew them all.

Fire yesterday devastated a great area of Stamboul in the vicinity of Akhri Kapusi (the stable gate), Turkey. Enormous damage was done.

The U. S. Senate committee on naval affairs yesterday restored to the naval appropriation bill provision for two battleships, stricken out by the House.

Margaret Ferrier, aged 6, grandchild of Mrs. Reinhardt, who was burned to death as the result of gas explosion Sunday, also died at noon yesterday at Berlin.

The U. S. House of Representatives' judiciary committee yesterday agreed to report favorably the Morris resolution aimed at the so-called "Coffee trust" in the United States.

Something For the Inner Bar.

An eminent judge used to say that in his opinion the best thing ever said by a witness to a counsel was the reply given to Missing, the barrister, at the time leader of his circuit.

He was defending a prisoner, charged with stealing a donkey. The prosecutor had left the animal tied up to a gate, and when he returned it was gone.

Missing was very severe in his examination of the witness.

"Do you mean to say, witness, the donkey was stolen from the gate?"

"I mean to say, sir," giving the judge and then the jury a sly look, "the ass was missing."

Why She Didn't Tell.

Perk—Say, Maria, you didn't tell anybody that secret I told you last night, did you?

Maria—Why, no! You see, I didn't know it was a secret.—Judge.

For Future Use.

Mother—I see you have written me a letter to say how sorry you are you took the jam. Well, I'll forgive you.

Johnny—Yes, ma, but please don't destroy the letter. It will do for next time.—New York Mail.

**Children Cry
FOR FLETCHER'S
CASTORIA**

G.T.R. Can Reach Boston.

Boston, June 4.—The bill which would permit the extension of the Southern New England Railroad (Grand Trunk) to this city was passed, to be engrossed by the Senate late yesterday, after the rejection of two amendments. An amendment adopted provided that the bonds be mortgage and not debenture. The bill has passed the House of Representatives, but the adoption of the amendment made it necessary to send it back to that body for concurrent action.

Waterloo Carries Bylaw.

Berlin, June 4.—Waterloo ratepayers carried a bylaw yesterday, voting a loan of \$10,000 to Charles Kreutziger, who will build a box factory. The majority for the bylaw was 292.

Hydro-electric power took a holiday for four hours yesterday afternoon, seriously crippling the street car service. A transformer was burnt out at the station, causing the trouble.

Crown Prince Emulates Teddy.

Berlin, June 4.—Crown Prince Frederick William has made his debut as an author. "From My Hunting Diary," which is now being printed, describes the crown prince's hunting experiences in Germany and abroad. Many photographs will appear in the book, some of them by the crown princess.

Convention Hall Seats 11,000.

Chicago, June 4.—For the third time since its erection thirteen years ago, the doors of the Coliseum will be thrown open June 18, for the accommodation of a Republican National Convention. In 1904 the Republicans nominated Col. Theodore Roosevelt for President in this building, and in 1908 under the same roof William H. Taft was chosen as the party's standard bearer.

About \$40,000 was expended in preparing the building for the convention. The building has 11,188 seats, of which 7,988 are on the main floor and 3,200 in the balcony.

Planet Peculiarities.

The irregularities of the great group of minor planets forming a ring between Mars and Jupiter are sensational. Several hundred of them are now known to follow their normal orbits between the two great planets. But in 1898 one of them—now called Eros—was found to cross the orbit of Mars, coming nearer to the earth's orbit than any other body, except the moon. In 1906 one of the planets was discovered going beyond the orbit of Jupiter, and now four with this peculiarity are known and have been named Achilles, Hector, Patroclus and Nestor.

Good Grounds.

"Why do you wish to be divorced from your husband, madam?"

"Well, for one thing, he comes home nearly every day of his life smelling of Limburger cheese."

"And you don't like the odor?"

"It isn't that. He never brings any of the cheese home."—Chicago Tribune.

Dr. de Van's Female Pills

A reliable French regulator; never fails. These pills are exceedingly powerful in regulating the generative portion of the female system. Refuse all cheap imitations. Dr. de Van's are sold at \$5 a box, or three for \$10. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont. Or at Hooper's Drug Store.

Inspector John Mulhall, street, was visited Sunday these gumshoe artists. T left were a few footprints scratches on the wall le kitchen window, which w of ingress: Sixteen dol was stolen. Not satisfi loot, the burglar crosse and entered the home Roper, at 15 Havelock st case a ladder was used window into the dining about \$1 in silver was only money was stolen hard to catch the thief

Miserable Women.

The world is full of them. Heaven bless them. They are not sick enough to go to bed and not well enough to thoroughly enjoy life. And to this vast host of women with pallid cheeks, weak nerves aching backs and disordered functions, Merrill's System Tonic can bring comfort, cheer and good health. Thousands already have been cured, for System Tonic strengthens the stomach, cures constipation, enriches the blood with iron, feeds the nerves with phosphorous and is withal a safe, economical and pleasant to take restoration to health, strength and consequent beauty. Three weeks' treatment in each 50c. box, 6 boxes for \$2.50. Get it from your druggist, or sent postpaid by The Merrill Medical Co., Merrill Building, Toronto.

Sold and recommended by T. B. Wallace, Druggist.

E TAKES HYDRO

Carried With Only 42 Votes Against.

of \$7,000 Will Also Be to Extend the Electric Light for the Distribution of Power in Parts of the Town—Engineers Will Begin at Once to Build Line into Barrie.

June 4.—The Hydro-electric notes being recorded yesterday against the raising by of \$7,000 for the extension of electric light plant for the Hydro power to the town was also carried only 46 negative votes. A vote to expend \$25,000 on power lines was carried with a bare majority of only 97.

The sum will be expended on a tar macadam roadway, in length, between Ward and Elizabeth streets. One of the main thoroughfares of the town, and it is largely automobile traffic, being the way leading from Toronto to the lake shore at and will be greatly improved into a beautiful waterfront and walk.

Hydro-electric engineers will lay out the construction of the power lines, and stated that the streets will be widened and factory wheels be run over Hydro-electric power in the Severn River by the September. The Barrie electric commissioners have made of the power users and were in favor of nearly all of the power to be sold to the Hydro division point works at lighting system. The Barrie and the Town Council unite a campaign to secure the power.

Need to Bribe.

San Diego, Cal., June 4.—That the notes of Clarence S. Darrow, a prominent lawyer, now on record of having bribed jurors in the case of the McNamara brothers to plead guilty before the trial of the alleged negotiations for the release of Juror George N. Locks indicated yesterday. A session of the county grand jury for the purpose of furthering the alleged corruption by the McNamara defence was held yesterday. Darrow's defence was designated as "expedition" which might be the return of several indictments against persons heretofore not in complicity in the alleged negotiations of the McNamara

Policeman's House.

June 4.—Even police are not immune from the brauders. One of the best men on the local police force, John Mulhall, 14 Havelock street, visited Sunday by one of the shoe artists. The only clues were a few footprints and some on the wall leading to the

MUST NOT OCCUR AGAIN.

Rev. Dr. Briggs Explains Issue of Objectionable Book.

Woodstock, June 4.—How a now celebrated though publicly nameless book happened to be issued from the Methodist Book Room when in character it was not adjudged fit for circulation was explained to the Hamilton Methodist conference yesterday afternoon by Rev. Dr. Wm. Briggs, book steward. The issuing of this book was harshly criticized by Rev. J. W. Aikens Sunday, he believing it to have been published by the Book Room.

Dr. Briggs, who reported that the Book Room business had yielded \$23,000 to the superannuation fund, said the book in question came in the ordinary course from a very reputable publishing house in London. "The book has no imprint upon it of our house, but of the London house," said the doctor.

Rev. J. W. Aikens replied that the book had been advertised with the name of Wm. Briggs after it and his wife, who had started to read the book before she knew its character had described some parts to him and they were not fit to be described in conference. This kind of thing had happened in the Book Room before, and must not happen again if it were possible to prevent it.

Rev. Dr. Smythe of Wesleyan Theological College, Montreal, announced that \$250,000 had to be raised to erect and equip a new college.

Various reports were given, and the church union vote was reported, the total vote for being 31,280 and against 5,341, or six to one in favor.

CHURCH AND STATE.

Bishop of Joliette Denounces Catholic Liberalism.

Montreal, June 4.—Catholic Liberalism, political and social radicalism in general, and certain political tendencies in Canada are all severely condemned in a circular letter to his clergy by Bishop Archambault of Joliette. He says in part:

"The ideas of Catholic Liberalism were comprised in the political program of a political party in this country a good while since, or, at least, it was the program of many leading members of that party, yet, thanks to the breadth of view possessed by its leaders later on, these dangerous doctrines were put aside."

Still, he adds, many Catholics without realizing it are influenced by these principles. His lordship scored the pleasure-seeking school. The Catholic mentality, he says, is not so strong as twenty years ago.

His lordship says that "Catholic Liberalism bows before the church, salutes her not only as a religion, but a veritable society organized hierarchically; yet, at the same time it seeks to take away one by one every right properly belonging to a free and independent society. While Catholic Liberalism declares that a perfect entente should exist between the church and state, it exaggerates the rights of the state to such an extent as to wish the church placed under her absolute domination. Catholic Liberalism reads in two the conscience of the citizens, which, as a matter of fact, is one."

Jim Hill Invading Canada?

Winnipeg, June 4.—An evening paper yesterday published what it claims as reliable information on the

NEW CAMP IS FORMED

Rural Regiments Arrive at Niagara-on-the-Lake.

Seven Corps Are Greatly Under Strength on Account of the Late Spring and Those Present Are Mostly Recruits—Prohibition Order in First Camp Had Little Effect Because of the Hotels Nearby.

Niagara-on-the-Lake, Ont., June 4.—Greatly under strength are the rural regiments, which arrived in camp yesterday for twelve days training. Not more than 2,000 men, consisting principally of recruits, are now under canvas, and fully 3,500 were expected by staff headquarters. The late spring is attributed as the cause of the poor showing, the farmers being unable to leave their work. Had the camp opened two weeks later things would have been different.

They are a good-looking bunch of lads in the seven regiments which came yesterday. According to the officers they size up better than ever before. Most of them are young and have never worn uniforms before. In a weeks time it is expected that the rough edges will be knocked off and they will be able to do their work in a fairly good way.

The regiments comprise the 14th and 5th Brigades commanded by Lt.-Col. Wallace and Lt.-Col. Cohoe.

Before the rural men came the city regiments had returned to their homes, every man satisfied, looking tanned and healthy.

There is considerable hub-bub among the Royal Canadian Engineers, who have been on the grounds six weeks making all the necessary preparations for the coming of the troops. The engineers have lost their canteen. There are protests galore, but with no effect. There are only 23 engineers in the detachment. They are regulars attached to Stanley Barracks. They object to being treated like volunteers. Previous to the opening of camp, the men had their own canteen, but when the embryo soldiers arrived the lid was placed on it just the same as in the case of the militia, pursuant to the order of two years ago.

Is there a greater consumption of liquor now than when the canteens were wide open? Is the live question now among military men. Opinion naturally differ. But many officers are outspoken in their views that instead of men taking a drink or two of beer at the canteen as of yore, they go around the corner of the camp and consume three or four, five or six, or even more. "Men who drink will drink despite the obstacles placed in their way," said one officer. True, there is not as much drinking in camp, but it all amounts to the same thing. The men drink elsewhere.

Just one hundred yards from the historic common, where the soldiers

"YOU'LL SUFFER ALL YOUR LIFE"

That's what the Doctor told him

"Fruit-a-tives Cured Him"

CHESTERTON, ONT., Jan. 25th 1911
"For over twenty years, I have been troubled with Kidney Disease, and the doctors told me they could do me no good, and that I would be a sufferer for the rest of my life."

I doctored with different medical men and tried many advertised remedies, but none of them suited my case.

Nearly a year ago, I tried "Fruit-a-tives". I have been using this fruit medicine nearly all the time since, and am glad to say that I am cured.

I give "Fruit-a-tives" the credit of doing what the doctors said was impossible.

I am now seventy-six years old, and in first class health"

GEO. W. BARKLEY.

In all the world, there is no other remedy that has cured so many cases of so-called "incurable" kidney disease, as "Fruit-a-tives".

This famous fruit medicine acts directly on the kidneys—healing and strengthening them—and ridding the system of the waste matter that poisons the blood.

50c. a box, 6 for \$2.50, trial size, 25c. At dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

are located, is an hotel, which does a land office trade. Another a hundred yards away is another saloon. And not far from this one is another. Down near the wharf where the Niagara boats dock are two more liquor emporiums.

The moment the men are allowed to leave the camp confines there is a parade downtown. Of course this is not the case with all the troops. Many stay on the grounds and indulge in athletic sports, but a great number strike off on a road that generally leads to a bar where drinks are served.

To Protect U. S. Shipping.

Washington, D.C., June 4.—The House yesterday passed a bill designed to protect American shipping and commerce against alleged monopoly of the so-called foreign "shipping trust." The committee introducing the measure reported that 90 per cent. of all shipping entering American ports was in foreign pools and that no competition existed.

Refusal of clearance papers to "trust" ships, refusing entry to American ports and the imposition of heavy fines or the confiscation of such vessels, are among the penalties provided for conviction of violation of the law.

SOWING HIS WILD OATS REAPING A HARVEST OF SORROW

How many young men can look back on their early life and regret their misdeeds. "Sowing their wild oats" in various ways.

Jim Hill Invading Canada?

Winnipeg, June 4.—An evening pa-
per yesterday published what it
claims as reliable information on the
plans of James J. Hill for capturing
a big share of the transportation of
the Canadian prairie west.

"He calculates," it says, "to gain
possession of the carrier traffic east-
ward to Hudson Bay and the Great
Lakes and westward to the Pacific
coast for routing Canadian grain
through the Panama Canal. His sur-
vey gangs are working in every pro-
vince of the west and his charters
are already secured. His associates
at Fort William have purchased a
large section of water front and he
is laying his plans to get there from
the heart of the prairies.

"In British Columbia he is building
westward under the name of the Vic-
toria, Vancouver and Eastern, and
has almost pierced the Rockies,
whence charters he holds will carry
him through the great wheat plateaus
into Winnipeg. Other charters fur-
nish him an entrance into the Peace
River country—the very last west-
and a direct route to Fort Churchill
on Hudson Bay."

Will Be Moderator.

Toronto, June 4.—Rev. Dr. Mc-
Queen, a brilliant graduate of Knox
College, Toronto, will be elected mod-
erator of the Presbyterian General
Assembly, which convenes on Wednes-
day, June 5, at Edmonton.

Rev. Dr. R. P. McKay, foreign mis-
sionary secretary, the retiring moder-
ator, has received word that so great
will be the attendance of Presbyter-
ians from all parts of Canada and
from the young and rapidly growing
cities of the western provinces, that
the hotel and lodging house accommo-
dation has already been pre-empted
and the skating rinks are being fitted
up with camp beds for the visitors
to the general assembly.

Rev. Dr. McQueen, the next moder-
ator, is an Ontario farmer's son, and
spent his boyhood in the country.
Since his induction to the ministry
he has been continuously pastor of
the First Presbyterian Church, Ed-
monton. He is regarded as a conspic-
uous type of the young Canadian who
may go west and grow up with the
country.

Thunder Bay Prison Farm.

Fort William, Ont., June 4.—With
the intention of making a preliminary
inspection preparatory to beginning
actual work on the erection of the
Thunder Bay and the Rainy River
district prison farm buildings, for the
construction of which \$20,000 was ap-
propriated two years ago by the Pro-
vincial Government, Dr. Bruce Smith,
the provincial inspector of prisons
and asylums, accompanied by J. R.
Elliott and L. A. Law, officials of the
Public Works Department, arrived
here yesterday morning.

They inspected the proposed prison
site, situated about six miles west of
Fort William, in Paipoonge Township,
consisting of 600 acres.

Gotham Boys' Real Desperadoes.

Niagara Falls, Ont., June 4.—Armed
like real desperadoes, two New York
boys, Roy Wallerth and Myron White,
were picked up by Canadian immi-
gration authorities after entering the
country aboard a freight train. Their
guns were confiscated and a \$10 fine
imposed. Their parents wired the
money last night.

Jas. Gordon would like to hire a horse for the next three or four months. Anyone having such to spare, will kindly let him know as soon as possible. Centre street, Napanee.

Good Laying.

Mr. F. H. Pollard, Adolphustown, has a flock of 10 Plymouth Rock hens, which laid an average of 28 eggs each and 2 eggs over during the month of May. These hens have been laying well all spring. Mr. Pollard would like some poultry fancier beat this record.

Invincible No Longer.

On Monday last the Enterprise Base Ball Team defeated the Tamworth boys by a score of 14 to 5. The return match will be played at the Continuation School picnic in Tamworth on June 13th. An interesting game is expected as the Tamworth boys are anxious to regain their lost reputation.

Social

A social, under the auspices of the Woman's Foreign Missionary Society of the St. Andrews Presbyterian church, will be held in the basement of the church on Friday, June 14th at 8 o'clock. A good programme, including a description of the city of Rome by a recent traveller through Italy, will be rendered, after which refreshments will be served. A voluntary offering for missions will be taken at the door. Everyone welcome.

Annual Meeting.

The annual meeting of the Napanee Ladies Musical Club was held in the Town Hall, May 9th. After a short program the officers for the ensuing year were elected:

Mrs. F. VanLoven—President.
Mrs. F. F. Miller—1st Vice Pres.
Mrs. W. S. Herrington—2nd Vice Pres.

Mrs. J. W. Robinson—Secretary.
Mrs. C. M. Stratton—Treasurer.

Removed Collector.

The Borden government has added another to its already long list of dismissals. On Tuesday, D. T. Rowse, for the past thirteen years collector of customs at Bath, was informed by his superintendent that he was dismissed on the grounds of active partisanship. Of course all who know Mr. Rowse are aware that for years he has taken no active part in electoral campaigns, but it needs now but a very flimsy excuse, indeed, to cause the removal of any official, no matter how valuable their services may have been.

Come to Napanee celebration Monday, July 1st.

She Liked Another Man.

A couple from Napanee finished their celebration of the King's birthday in Kingston, with a "scene" in Beefsteak Jack's restaurant, on Brock street, Monday evening. It appears that the woman met a gentleman in the eating house whom she took a liking to, and decided she would not return to Napanee with her husband. The police were called and tried to settle matters. The husband was de-

Keep in mind the Military Euchere and Dance to be given June 12th in the Odd Fellows Hall by the Hospital Aid.

The new Continuation School at Tamworth will be officially opened on June 13th by the Minister of Education.

The Ladies Aid of Trinity church will give a birthday social on Monday evening, June 24th. Full announcement later.

A bonfire started a small fire on the roof of the rear of Mr. H. M. Deroche's residence, on Wednesday morning. The firemen extinguished it in a few minutes, before much damage was done.

The annual party of Scotch Girls arrived in Brockville this week, and will be at the various stations along this line to be met by their respective guardians on Saturday of this week, June 8th.

Engineer Andrew Gray was in Newburgh last week, where he in company with the engineer of the C.N.R., met to settle a dispute between that railroad and the county of Lennox arising over the closing up of certain streets in the village of Newburgh. The outcome of the arbitration was the C.N.R. will pay the village of Newburgh about \$1,000.

When painting houses and barns, there are a few important facts to keep in mind. One gallon of Sherwin-Williams specially prepared outside paint will cover 300 square feet, two coats. It will not chalk off like white lead. You use every drop in the can, there is no waste and no time lost in mixing. The Medical Hall—Fred L. Hooper, agent for Napanee.

On Tuesday, Anthony Rankin, M. P. P., and W. D. Black, M. P. P., in company with two engineers of the Seymour Electric and Power company, paid a visit to the drowned lands in Camden, Portland and Hinchinbrook townships. The members of Frontenac and Addington wanted the Seymour representatives to see the conditions of things. Recently this company acquired the power rights on the Napanee river, including the Petworth dam, which is causing the trouble. It is hoped that the company will do something to afford relief to the farmers whose lands are inundated. Mr. Rankin states that for a whole mile in the vicinity of Petworth, the party drove through nearly three feet of water on the main highway. The stage has to go through this every day. In one place, a bridge was actually floating. For the past few years the farmers of that district have tried to get relief, and the Ontario government some time ago sent engineers to report upon the condition in three townships.

A. S. Kimmefly continues selling Five Roses Flour \$2.85 and Harvest Queen \$2.60, best Flours for the least money. New Timothy Seed \$7.00 per bush, all kinds of Seeds at bottom prices. M. S. MADOLE.

June 13th a Civic Holiday in Sheffield and Camden.

The township councils of both Sheffield and Camden have declared Thursday, June 13th a civic holiday to allow the children, teachers and citizens to hear the Minister of Education when he officially opens the new continuation School at Tamworth. There will be a monster picnic on the grounds and in the grove adjoining. An elaborate dinner will be served; a base ball match will be played between the Enterprise and Tamworth teams and there will be an interesting series of sports for which a purse of fifty dollars has been subscribed. Music will be furnished by the Enterprise Brass Band throughout the day. Return tickets will be sold on the Bay of Quinte Railway at one-way and will be good to return on the following day.

See in F. Chinneck's jewellery window the copper stencil monograms by which you can stamp all your linen as many times as you desire to from the same pattern and they are cheap.

High Court.

The non jury sittings of the High Court of Justice opened at the Court House on Monday before His Lordship, Justice Middleton. The following cases were disposed of:

Freeman vs. Bank of Montreal—This was an action brought by John W. Freeman, formerly of Deseronto, to recover from defendant \$1300.00 and interest. The plaintiff claimed that in 1905 he deposited with defendants of Deseronto \$1800.00 and that at this time he was an infant and on the 20th of April, 1908 still being an infant he drew a cheque on the Bank of Montreal for \$1800.00 but contended that under the Bank act he could only draw \$500.00 and now claims from the Bank the balance \$1300.00. Judgement reserved W. G. Wilson for plaintiff, W. B. Northrup, K. C. for defendant.

Rikley vs. Stratton—An action brought by Elisha Rikley, and Benjamin Rikley, by Elisha Rikley his friend, against Dr. Chas. M. Stratton to recover damages. On the 12th day of December, 1911 Benjamin Rikley, a boy 8 years of age met with an accident by which his leg was broken above the knee and Dr. Stratton was called in to reduce the fracture and set the broken limb and the plaintiff claims that he carelessly and unskillfully reduced said fracture and negligently treated the same and claimed \$1000 damages in all. Several doctors from Kingston and Napanee were examined on behalf of both parties. Judgement reserved J. L. Whiting, K. C. and J. E. Madden for plaintiff, Herrington, Warner and Grange for defendant.

The old way was mustard or belladonna plasters. The new way is Merrill's Wizard Lightning. Cures all pain, aches or bruises in five minutes. Price 25c.

Sold and recommended by T. B. Wallace, Druggist.

We congratulate Miss Muriel Paul on having successfully passed her final examination at the Faculty of Education, University of Toronto.

Mrs. Major Deroche and baby, of Ottawa, are visiting her mother, Mrs. Bogart.

Mrs. John Rowe and daughter, of

The Acme of Politeness.

In the line of absolute and abstract politeness nothing can quite reach the heights attained by a certain English baronet who became the high sheriff of London. It was his invariable custom when hurrying along the street to salute any of his numerous acquaintances with a bow, a touch of the hat and the words, "Sir, I wish you a very good morning."

As high sheriff of a county it once became his painful duty to attend the execution of a criminal, when, having seen that all the preliminary arrangements were complete, he bowed, touched his hat to the culprit, whose black cap was already over his face, and took his leave with his customary:

"Sir, I wish you a very good morning."

When Leather Was Money.

Leather was very early used as a currency, the Romans employing it for this purpose before either gold, silver or brass came into common use. History is full of references showing that leather was used by the ancients as a sort of circulating medium of exchange. It is said on good authority that so late as during the reign of Louis XII of France the country became so impoverished and as a consequence money was so scarce that little pieces of leather with a small silver nail driven through each were in general use as money. Some few specimens of this leather money are still in existence, but are only to be found in the possession of numismatists, by whom they are highly prized.

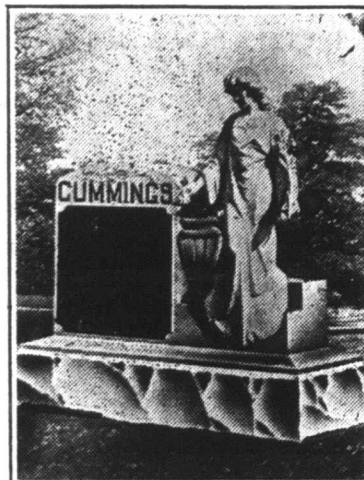

A Peace Pact.

The plumber had married the barber's daughter.

"No tips when you shave me hereafter, remember," he said.

"All right," quoth the barber, "and no charging it in the bill when you walk between my house and your shop any more."

On this basis they all lived happily ever after.

REDUCED GAS RATES.

We are pleased to announce to the public that the following New Gas Rates go into effect on MAY 1st, 1912 :—

Gross price \$1.50 per 1000 cu. ft. subject to the following discounts if accounts are paid within ten days from the day following the date they are deposited in the Post Office, Napanee, viz :

25c. discount per 1000 cu. ft. on all invoices for less than 5000 cu. ft. per month, making a net price of \$1.25 per 1000 cu. ft.

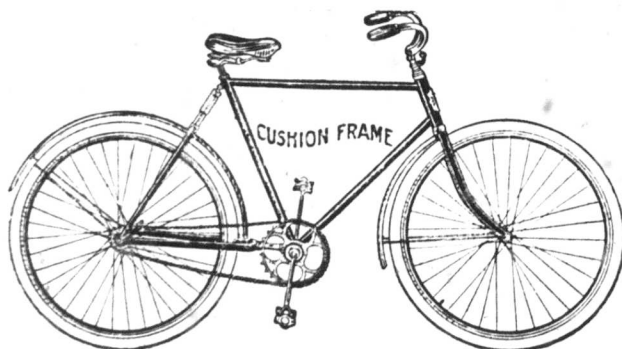

50c. discount per 1000 cu. ft. on all invoices for 5000 cu. ft. or more per month, making a net price of \$1.00 per 1000 cu. ft.

No meter rent will be charged excepting where the net invoice for gas for the month is under 50c, in which case 25c. meter rent will be charged, but on May 1st, of each year, credit will be given for all meter rent so charged, in case the consumer's net invoices for the preceding twelve months totals the sum of \$6.00.

NAPANEE GAS COMPANY, Limited

CHAS. A. WALTERS, Local Manager.

BACK TO BICYCLES

Owing to the fact that the Bicycle is coming back again to popular favor, we have increased our stock to double the quantity of last year's, and have reduced the prices on our Bicycles and Tires, and sundries. Our stock consists of the following well known makes:

Massey-Harris, Cleveland, Quick Step, The Falcon English Wheel and our own make, The Canadian.

All the above at less Prices than can be bought anywhere in Canada. We will sell a First-Class Bicycle, fitted with Dunlop Tires, Coaster Brake, and Mud Guard at \$25.00.

Call and examine before buying, no need to send out of town for a Bicycle, as we will not be undersold by anyone.
